WARNER & CO'S PHOSPHORUS PILLS.

PHOSPHORUS is an important constituent of the animal economy, particularly of the brain and nervous system, and is regarded as a valuable remedy for the following diseases:

LAPSE OF MEMORY, IMPOTENCY, SOFTENING OF THE BRAIN, LOSS OF NERVE POWER, PHTHISIS, PARALYSIS AND NEURALGIA.

The *Pilular* form has been deemed the most desirable for the administration of Phosphorus. It is in a perfect state of subdivision, as it is incorporated with the material while in solution, and is not extinguished by oxidation.

This method of preparing Phosphorus has been discovered and brought to PERFECTION by us, and is thus presented in its elementary state, free from repulsive qualities, which have so long militated against the use of this potent and valuable remedy. This is a matter requiring the notice of the physician, and under all circumstances the administration of Phosphorus should be guarded with the greatest care, and a perfect preparation only used.

Its use in the above named complaints is supported by no less authority than Prof. Delpech, Prof. Fisher, of Berlin, Dr. Eames (in the *Dublin Journal*), Dr. Burgess and Dr. Hammond, of New York. The special treatment indicated in these cases is—1st. Complete rest of mind, especially abstention from all occupations resembling that upon which the mind has been overworked; 2nd. The encouragement of any new hobby or study not in itself painful, which the patient might select; 3rd. Tranquility to the senses, which expressly give in these cases incorrect impressions, putting only those objects before them calculated to soothe the mind; 4th. A very nourishing diet, especially of shell-fish. 5th. The internal administration of Phosphorus in *Pilular* form, prepared by WILLIAM R. WARNER & CO.
