My wife rang the bell, and give orders to the maid who ans cered it, to see dher little girl to her at once. Ferrari manawhile engaged me in conversation, a. d strove, I could see, by entire deference to my opinious, to make up entire deterrace to my opinions, to make up for any offence his previous remarks might have given. A few nounents passed and then the handle of the drawing room door was timidly turned by an evidently f-lk-ring and unpra-tised hand. Nina called out impatiently—"Come in, baby! Do not be afraid—come in!" With that, the door slowly upon d and my little daughter entered. Though I had been so short a time absent from her, it was easy to see the child had changed very much. Her face lo ked was one of fair and district. The laughter had faded out of her vonng eyes, and was replaced by a se ions lok of pained was replaced by a serious to be particular resignation that was pitiful to see in one of her tender years. Her mouth droped plaintively at the corners—her whole demean ur had an appealing anxiety in it that spoke plainty to my soul and calligh ered me as to the way she had evidently been forg then and neglicies. She approached us his inalingly, but stopped

halfway and looked doubtfully at Ferrari. He met her alarmed g.ze with a mucking smile.

"Come alor g. Stella!" he s.id. "You need not be frightened! I will not aco d you unless you are naugh y. Silly child! you look as if I were the girst in the fary tale, going to tal you up for ainar. Come and speck to this gentleman—he knew your p pps,"

At this word her eyes brothtened, her small steps grew more as ared and steady she advanced and pusher tiny hand in mine. The vanced and put her tiny hand in mine. Thoughtless and cruel words! I at once understood the secret grief that we ghe ton the child's mind. Whenever she was fretful or petulaant, they evid ntly impressed it upon her partitions, they even thy impressed in upon the that her father had left her because of her naughtiness. She had taken this deeply to heart; no doubt she had broaded upon it in her own vague, childish fashion, and had puzzled her little brain as to what she had accepted the partition of the control of o could possibly have done to displease her father so greatly that he had actually gone away, never to return. Whatever her thoughts were, shedid not on this occasion give vent to them by tears or words. She only turned her eyes on Ferrari with a look of intense pride and scorn, strange to see in so little a creature—a true Romani look, such as I had often noticed in my father's eyes, and such as I knew must be fre quently visible in my own. Ferrari saw it, and burst out laughing loudly.

ABSTEXIOUSNESS.

There is no abstemiousness in the world, and no throft, like the thrift and abstem ousness of the av-race native of India. Alm at alone among the workingmen of the world, he has rate d hunself nearly above wants has stripped bunself of all the impedimenta of uxury. Milhimself of all the impedimenta of uxury. Millions of men in India, especially on the richer soils and in the river deltas, live, marry, and rear apparently healthy children upon an income which, even when the wife works, is rarely above 2s. a week, and f equally sinks to 18d. The Indian is enabled to do this not so much by the cheapness of food—for, theuch it is cheap, a European who ate the same food would want five times he mode, merely to teed hims If-as by a habit of living which makes han independent of the ordinary cares of man kind. Ho goes nearly without clothes, gives his children none, and drosses his wife in a long piece of the mest wretched muslin. Nei her he nor his wife pay tailor or untliner one shirling during their entire lives, nor do they ever pur-chase needles or thread, which, indeed, it is contrary to a semi-religious et quette ever to use. The power peasant humans a new tool taining a single covered room of the smallest size, with an earthen platform or two outside it; and as he constructs and repairs his own t; and as he constructs and repeats his own dwelling he virtually pays no rent, except for the culturable land. He never touches alcohol or any substitute for it. There is an mea in England that he cats opium or semp; but he, as a rule, swallows neither-fi stly, because he regards them with as much moral antipathy as any English gentleman, and secondly, because he could not by any posibility pay for articles which in India, as everywhere class, are exceedingly expensive. He eats absolutely no meat, nor any animal fat, nor any expensive grain like good wheat; but lives on millet or small rice, a little milk, with the butter from the milk, and the vegetable he grows. Even of these he eats more sparingly than the poorest Tuscan. Once a quarter, perhaps, he will eat enough, during some featival, but as a rule he knows accurately what will sustain him, and would be enraged with the wife who cooks for him if she prepared more. He is assisted in this economy by a religious rule which we have nover seen a Hindoo break, and which is, undoubtedly, like the rule against killing oxen, a survival from a military law or custom of the most remote antiquity.-The Spectator.

A nicely-dress-d gentle-man and a very pretty lady called for suppor and were shown to the ladies' apartment, which appeared on the frosted wind w looking into the ladies' apartment. The shadows dipped towards each other and seemed to give together in a lover's kiss. One snadow embraced the other, which seemed to sigh. Then there was a shuffle of feet and the shadows danced around on the frested glass as though in a collar-and-elbow wr-stling match. The whole hall was in a titter by this time, and the proprietor fearing scand d if the matter went any further, sent a servant to tap on the window and notify the guesss that they stood be ween the gas jet and the door, and that their every movement was painted on the glass.
