

ONTARIO GOVERNMENT HAS FEATURE EXHIBIT

Public Institutions Represented
and Work Done Under Direc-
tion of Provincial Secretary.

AN ADVANCE IN METHOD

Caring for Mentally Ill and De-
ficient Shows Marked
Progress.

The Public Institutions Exhibit is one of the most interesting government exhibits to be found in the Dominion Government buildings. It represents some of the work being done by the Ontario Government under the direction of the provincial secretary, Hon. W. J. Hanna, and illustrates the widely divergent activities of the department. The visitor will find here the work of patients in the hospitals for the insane, for the feeble-minded and for epileptics; the products of the farms and gardens of the above hospitals; the Ontario Reformatory and Industrial Farms. The manufactures of the Ontario Reformatory are also very strikingly illustrated in the exhibit of blankets, tweeds and flannels from the woolen mills, the hospital furniture and institution furniture from the woodworking factories of the reformatory and from the Provincial Clay Plant at Mimico, which is a branch of the Ontario Reformatory. The exhibit is thus divided into three distinct sections, viz., the Hospital Section, the Farm Section and the Industrial Section.

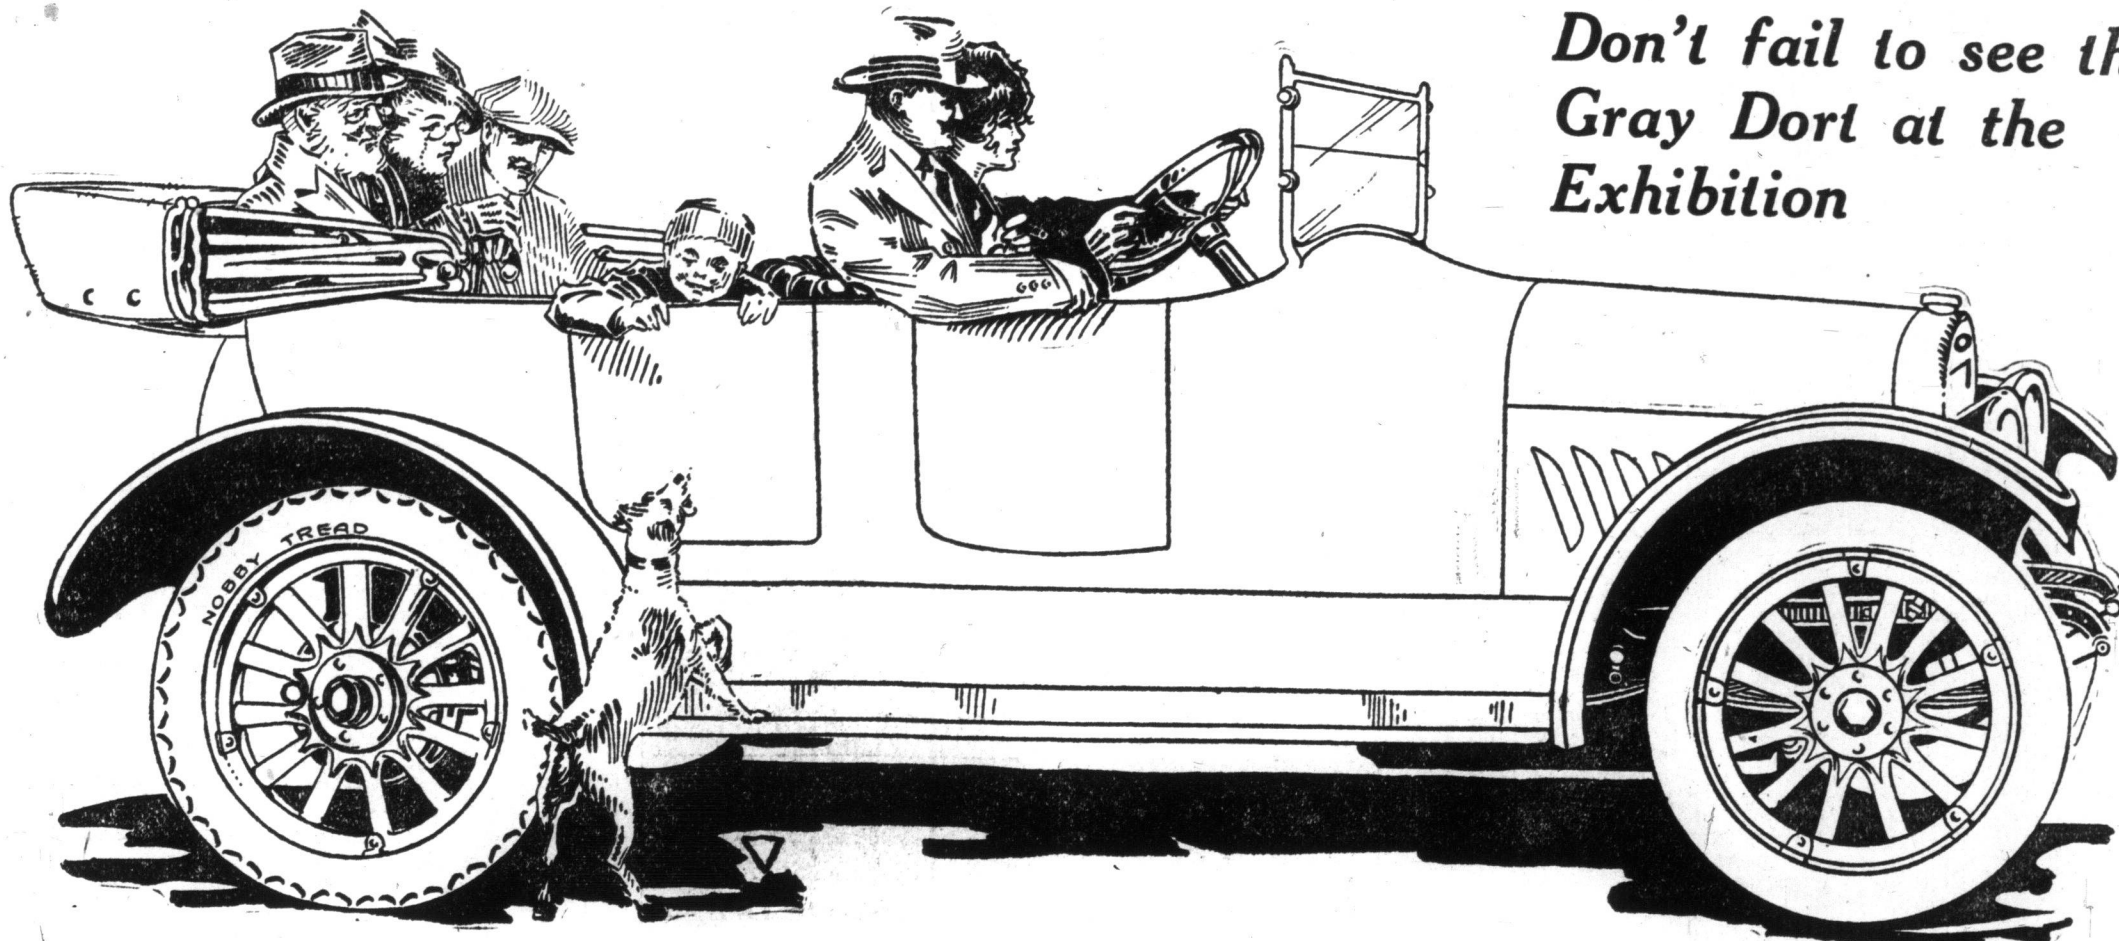

The Hospital Section.
The advances in the methods of caring for the mentally ill and deficient in the Province of Ontario is one of the most marked features of the progressive administration of the department of the provincial secretary. Three graduate nurses of the hospital training schools, which have been established at the different institutions for training the nurses in psychopathic work, are in constant attendance to explain the work done at the hospitals. The graduates of the training school of the hospital are equal in skill and training to those of any of the public hospitals, and this feature of the hospital work is indicative of the complete change that has taken place in the treatment of the mentally afflicted. An interesting part of the exhibit are photographs showing the treatment given in the hospitals in connection with the patients, continuous baths, needle baths, surgical operations and all of the means known to science for the alleviation and cure of disease. The system of clinical records is exhibited, where a complete history of the patient is kept from day to day and study made of the whole problem of insanity, through individual study of each case. A very attractive feature is the work of the women patients, as exhibited in the showcases. Some exceedingly fine needlework is exhibited in these cases.

The Farm Section.
The farms of the public institutions have now become a very prominent feature in the economy of the department. The total product of the farms of public institutions amounts to over \$125,000 per annum. The exhibit shows a variety of grains, grasses and clovers, grain seeds and vegetables of all kinds from the gardens, which are good evidence that the inmates of the public institutions are profitably employed helping to produce food required by them and thus reduce the financial burden on the province. A special feature of the farm section is the exhibit from the Sudbury Industrial Farm. Two years ago the government established a new industrial farm some 21 miles south of Sudbury, for the purpose of taking care of the prisoners of the northern districts. These men were set to work to clear the land and to prepare the place for the establishment of a great cattle and sheep ranch for the production of meat and wool required to supply that part of the food and clothing of the inmates of all the institutions. 35,000 acres have been set aside for this purpose. The productiveness of the land is well illustrated by the exhibits of potatoes, grasses, roots and vegetables. An exceptionally fine quality of celery is a part of the vegetable exhibit from this place. Photographs showing cattle and sheep on the pasture ranges of the big farm are to be seen. These animals and the wool from the sheep are shipped to the abattoir and the woolen factories at the Ontario Reformatory, and there prepared for use at the other public institutions. An interesting feature is the little of fresh blueberries, of which there are some fifty acres growing on the farm. These are being picked by the prisoners and shipped to the canning plant at Hamilton and there canned for consumption in the public institutions.

Industrial Section.
Occupying the middle section of the exhibit is a pagoda-like structure built to exhibit the products of the Provincial Clay Plant. The floor is of tile, decorated equal to any of the imported products. The roof is covered with Spanish tile. The floor tile, sanitary ware, and all the specialties that enter into the making of a perfectly sanitary floor and the Spanish roofing tile have in the past all been imported into Canada either from the United States or England. The Ontario Government has shown a Canadian manufacturer of clay products that there is a whole of unexcelled quality for the making of tile in the province, and there is a growing demand for the material. An excellent exhibit of the various kinds and sizes of the manufactured is also to be found, and illustrates the importance of the use of tile in the making of perfect sanitary floors and weather-proof roofs have been worked out. To the average visitor one of the most striking of the exhibits is that of the blankets and cloth manufactured at the reformatory at Guelph. Some 4000 pairs of blankets were sent to Camp Ontario to the Ontario Military Hospital. From the furniture factories at the reformatory are exhibits of hospital beds, mattresses, hospitable furniture, hospital chairs, medicine cabinet, hospital stands, surgical basins, all made of the best white enamelware. The beds, bedside tables, mattresses and complete hospital outfit were also sent to the Ontario Military Hospital at Camp Ontario. In all over 100,000 worth of material was manufactured by the industries of public institutions and forwarded for the outfitting of this hospital.

In the hospital section of the exhibit are to be seen photographs showing the hospital in place and occupied in the building. The exhibit shows the work of the new Hospital for Insane at Whitby, the buildings constructed for the department of agriculture by the provincial secretary's department, are also to be found, illustrating the manner in which all of the materials manufactured by the various industries furnishing the public institutions, the exhibit of the industrial section shows how thorough has been the organization and the initiative of the department in undertaking this new line of activity for the employment of the inmates of the reformatory and in the

1917 Announcement

Don't fail to see the
Gray Dort at the
Exhibition

WE have no startling announcement to make for 1917. We are proud to say that the 1916 Gray Dort has exceeded even our expectations. We expected great things of this wonderful car. We KNEW the Gray Dort was the real car—no matter what price. Today hundreds of motorists are fellow enthusiasts with us in our admiration of this exceptional car. The Gray Dort has taken Canada by storm.

GRAY DORT \$885

ADDED REFINEMENTS

The Same Tremendous Power and Strength—
Greater Luxury of Comfort and Appearance.

EVEN GREATER VALUE

We couldn't improve on the wonderful Planché motor—that veritable giant of power in the Gray Dort. The sturdy, rugged heavy frame stood the severest tests. Mechanically the Gray Dort was, and is correct. In the searching investigation we did not find a Gray Dort owner who was not enthusiastically satisfied—even amazed—with the performance of his car.

We have added some final refinements

to the car—made it bigger and it is now the roomiest car at anywhere near the price. A larger windshield—an ammeter—dashlight—robo rail and footrail—in every way the sturdiest and most mechanically perfect car is now the most refined and comfortable car.

Read the specifications. Remember that in three days motor experts bought up the entire 1916 output of this car.

F. O. B. CHATHAM

Motor—Gray Dort weighing 318 lbs., 4 cylinder, cast en bloc, L-head type, bore 3½ in., stroke 5 in., speed 2000 R.P.M., horsepower 28. Enclosed valves, mushroom lifters, cast iron removable heads, 15-20 carbon steel stems, 40-50 carbon steel drop-forged I beam connecting rods. Cam Shaft—15-20 carbon steel high tempered with three phosphor bronze bearings. Timing gears—cast iron helical. Carter Carburetor. Thermo-siphon cooling, 3 gallon tank and fan radiator. 4 quart oil pump and splash lubrication. Westinghouse two unit starting and lighting system. Connecticut battery ignition. 12 inch cone clutch with 6 compensating springs. Three speed and reverse selective transmission, with double row new departure bearings. Universal joint. Gasoline tank under cowl. I beam Heavy Duty front axle. 7 floating rear axle, with forked tube torsion and Hyatt High Duty bearings. 1½ inch chrome nickel steel propeller shaft. 10 inch internal expanding and external contracting brakes. Pressed steel frame. Springs—front 27 in. elliptic, rear 50 in. full cantilever. Left-hand drive. 16 in. irreversible worm and nut type steering wheel. Gear shift lever-center control. Emergency brake, right pedal. Service brake, clutch pedal. Accelerator pedal. Spark and throttle control on steering wheel. Artillery type wood wheels. Detroit demountable rims. 30 x 3½ Dominion tires. Nobby tread rear. Westinghouse electric lighting. Linoleum covered running board. Lock ignition switch. Dashlight, ammeter, robo rail, footrail, clear-vision windshield, one-man top, tools, equipment complete.

Wheel Base—105 inches.

Weight 2100 pounds.

RESOURCES COMMITTEE HAS ATTRACTIVE DISPLAY

"To dress extravagantly in war time is worse than bad form, it is unpatriotic," is the text of a striking poster that is displayed in the government building by the organization of resources committee, whose display is attracting great attention. A statement of Ontario's share in the war is also interesting, outsiders being greatly surprised on learning that the pro-

possession of the erection of the public buildings of the province. The whole reflects great credit on the assistant provincial secretary, Mr. S. A. Armstrong, who has added to his regular administrative duties the great work of organizing these manufactures and carrying on such extensive structural work.

An interesting group of patients suffering from shell shock are shown with their wives at No. 4 London General Hospital in this week's issue of The Toronto Sunday World.

vince has contributed 42 per cent. of the total enlistment of 354,000 and other such information. Literature on such subjects as saving and subscribing to the Canadian war loan is being distributed by Corp. C. A. Wyatt, a veteran, who is in charge of this interesting exhibit.

GIVEN MILITARY MEDAL.

Canadian Associated Press Cable. LONDON, Sept. 1.—The following Canadian infantrymen receive the

military medal:
404667, J. S. Baird; 50162, Corp. S. W. Brishin; 406061, F. Croxford; 428153, Sergt. W. A. Dawe; 53648, A. Forrester; A2927, D. C. Grey; 428779, Sergeant C. B. Hamm; 405942, Q. King; 77148, Sergeant E. Lane; 61195, Corp. A. Lebel; 55088, Corp. A. F. Lynch; 16255, Corp. S. McDowell; A6474, W. D. G. Reid; 429077, Sergt. D. N. Ross; 55300, C. J. Ruler; 47614, N. Scott; 7194, R. E. Shiel; 1624, Sergt. H. H. Weeks; 55319, N. A.

GRAND TRUNK RAILWAY—JACKSON'S POINT SERVICE.

Special week-end train leaving Toronto 1:40 p.m. Saturdays for Jackson's Point, will be discontinued after Sept. 2. Special train leaving Jackson's Point each Monday for Toronto will run Tuesday, Sept. 5, instead of Monday, Sept. 4, and will be discontinued after that date.
