

FACULTY OF MEDICINE.

It is a subject of congratulation to the University that, in spite of the fact that the sessions have been lengthened from six to nine months, the number of students in attendance has steadily increased.

The popularity of the six-years' Course of Arts and Medicine is demonstrated by the fact that 16 students in the Faculty of Arts have enregistered also in Medicine and are now proceeding to the double degree of B.A. and M.D.

The Faculty of Medicine is arranging to establish this year, for the first time, a Course of Lectures and Clinics, together with advanced laboratory work for Graduates in Medicine and Practitioners, who desire to keep abreast of the more recent advances in Medicine and Surgery. This Course will begin towards the end of April, and will last for a period of about six weeks.

FACULTY OF ARTS.

The total number of students is 392, of whom 203 are undergraduates, viz., 58 in the First Year, 57 in the Second Year, 50 in the Third Year, and 38 in the Fourth Year. 19 are Graduates.

Of the undergraduates 61 are women, and it is a special feature of this year's report that the number of women undergraduates whose homes are outside Montreal exceeds the number from Montreal.

The illustrated lectures in several of the Courses of Lectures are most attractive and instructive.

Some 16 students are taking the combined six years' Course in Arts and Medicine.
