At a conference in Montreal on Tuesday an agreement in form was arrived at by the National Foundry Association and the Iron Moulders' Union whereby moulders will be paid a minimum of \$2.25 per day, and coremakers a minimum of \$2.10. This is an increase of 15 and 10 cents per day respectively.

At a meeting of the Brewery Workers' Union last Friday night that body decided to accept the compromise offered by the employers of 12 1/2 per cent. increase in wages. The agreement provides that when the men have a grievance they may send a deputation from the union to discuss it with the employers.

Herbert L. Scott, an old Toronto boy who is now General Secretary of the Sawmillers' Union of North America, paid The Toiler a visit this week. He is spending a few days in the city on his way home to Indianapolis from the international convention, which was held in New York last week and the most successful one ever held.

Bread Salesmen's Union No. 33 held a very successful meeting Tuesday evening last. At Monday's meeting of the striking Iron Moulders' Union the following resolution was passed: That this Union of Iron Moulders do hereby express their approval of the stand taken by E. F. Brook, the member for Centre Toronto, in connection with the Mulock arbitration bill.

At the bottom, Christ was killed for his sympathy with the poor and contempt for the rich and unjust. He was rewarded by the respectable classes as an outlaw and a felon. And if you please, as an Anarchist.—Rev. Myron W. Reed.

HIGH WAGES DETER PRODUCTION.

Editor Toiler:—The increases in wages last year and the year before and the advances in the cost of building material during the same period have prevented several large building operations from being gone on with. The above appears in the Globe, and the contents of the article have been postponed, undoubtedly because of the excessive cost. The names of those who contemplated building are given as: The Confederation Life Association, Lion-Cat, Pelletier and the Canada General Electric Company. In a primitive state of society all who were able were expected to produce commodities, and so could exchange products with each other. In the present complex conditions of society the "principles" obvious in the simpler relations of a merely disguised and not abrogated or reversed by the more intricate relations that result from the division of labor and the use of complex tools and methods. Such being the case, what have the "progressive" legislators done to the building trades in exchange for the buildings to be erected? They may say that they give to the trades a claim on the products of others in the shape of bank notes, but the legislators enable them to fill the products of producers, and that they have a right to buy the labor of producers as cheap as they can. And these legislators enable the capitalists to obtain all their products and justly so, to judge as to the wages which producers shall receive. Producers have a right to all the products which they produce, to make any exchange as all their produce will enable them to obtain. And producers alone have the right to determine as to the wages they shall receive and the basis on which they shall be exchanged for other products. The legislators have the right to obtain all their products and justly so, to judge as to the wages which producers shall receive.
