### COLONIZING NEW ONTARIO.

WORK OF THE COLONIZATION BUREAU THIS SEASON.

How Settlers Are Alded in Finding Homes The colonization system established by the Provincial Government in order to aid settlers in taking up homes in the cultivable portions of New Ontario, has been in operation throughout the season. Mr. Thomas Southworth, Director of Colonization, states considerably larger than was anticipated. The machinery of the Bureau being new and much remaining to be done in the way of organization, it is hoped that with the experience of this year as a guide considerable improvements will be effected before next sea-

The considerable movement of population to the cultivable lands along the line of the C.P.R. in Eastern Algoma, from Sudbury to Sault Ste. Marie is also receiving attention at the hands of the Bureau. A good deal of good land is being taken up around Lake Nipissing. Much land in this direction, now accessible with difficulty, owing to its distance from the railway, will be more easily reached next season, as wagon roads are constructed. The growing settlement a the northern end of Lake Temiscamingue has also attracted a number of home-seekers. French Canadians predominate among the arrivals in the been your worst enemy. Good-bye". Lake Nipissing settlement, where many of their compatriots are already established, some of whom are thriving and well-to-do farmers. A number of the French, however, combine lumbering with agriculture, and are engaged for several months in the lous lady-love. On the receipt of her tunate in being under the rule of Miss to make much progress in clearing to Lancewood. their lands. The French-Canadians

ments in East Algoma. CONDITIONS OF SETTLEMENT. The conditions of settlement under which free grants are given involve the construction of a house 16 by 20 feet and the clearing and cultivation of fifteen acres of land within the five years that must clapse before the patent is issued. The buildings put up are nearly all of the old-fashioned loghouse type, the material for which costs from \$5 to \$20, according to lo cality, for which the labor is usually supplied by neighborly co-operation In other than free grant districts the land can be bought at a merely nominal figure. No assisted passages or the Bureau, but the impression to the contrary largely prevails, and many letters are received from all parts, looking for such assistance.

THE BAG FAD.

Paris carried hung on her wrist last fall, are now due to become equally They are no end of a convenience, as they hold all a woman's small belong ings and add much to her comfort At many of the jewelers are to be jeweled eyes and a chain of gold links through which to slip one's hand, will rough which to slip one's hand, will the most favored of fashion.

OIL AS FUEL.

Tests of oil as fuel, made in the navy, have not so far proved satisfactory. Patent fuel, made of coal dust and tar, was found to yield near-
