

DRUGS—Tabulated Statement, &c.—Continued.

LIME JUICE.

No. of Sample.	RESULTS OF ANALYSIS.				Remarks by the Analyst.
	Specific Gravity.	Citric Acid.	Solids.	Ash.	
	p. cent.	p. cent.	p. cent.	p. cent.	
1813	1039	54.80	8.3	.45	A good preparation.
1815	1038	56.60	8.62	.40	do
436	1037	7.14	8.2	Pure lime juice of good quality.
503	1034	7.	8.76	Pure lime juice of good quality. The small quantity of alcohol present having either been formed naturally in the juice, from slight fermentation, or added to aid in its preservation.
2612	1034	7.15	8.72	do do do
2708	1032	7.04	8.	Pure lime juice of good quality.

GAR.

		Acetic Acid.			
2015	1006	3.9038	A poor sample of vinegar, containing only a very small per cent. of acetic acid over the smallest quantity allowed by regulations. Contained some alcohol, amount not estimated.
2033	1006	3.6	.24	.222	Contains traces of sulphuric acid and some alcohol—not estimated. This sample I do not consider a good article, and though free from mineral adulteration is not a genuine vinegar.

ROOT.

	Moisture.	Ash.	
2011	12.29	.15	Genuine.
2031	12.83	.25	Genuine.
