

Built Strong for Pulpmill Service

WHERE loads are heavy and variable, where dust, dirt and dampness spell disaster for less sturdy equipment you will receive consistently good results with

WATEROUS TRANSMISSION MACHINERY

- Dependable equipment for transmitting heavy powers.
- Combines strength and sturdiness in a high degree.
- Nothing dainty or gingerbread about it.
- Materials carefully selected.
- Workmanship honest and thorough.

Waterous Transmission Machinery has not been 'adapted' to Pulpmill power transmission work—it is built for it. We use it in all our mill installations and can honestly recommend it.
