

case: Genevieve "revised", made by  
the parents at their homes, is  
always in short lengths and a  
roll of 50 yards might be in  
fifteen pieces.

With respect to the coal oil  
which is reported to be only  
48% instead of 60 gallons, the  
contractor should of course  
be paid for that quantity only;  
the schedule calls for so many  
gallons and the payment should  
be regulated by the quantity delivered.

I have the honor to be,

Sir,

Your obedient servant  
  
for Deputy of the Dept. of  
of Indian Affairs

7.
