SCROFULA.

This is the plague of our country, as well as of nearly every nation, and is the parent of consumption and most wasting diseases of the blood. Scrofula usually develops early in life, and is characterized by glandular swellings, especially of the neck. It is simply bad blood, low vitality and poor nutrition, giving rise to sores, sore eyes, abscesses, tumors, diseased bones, white swellings, hip disease, etc. Consumption is really scrofula of the lungs. It is often inborn, but may be acquired by any cause that will impair the blood, such as bad air, improper food and irregular habits. Burdock Blood Bitters, by regulating all the *secretions*, and exciting a healthy action of the absorbents to nourish the system with pure blood, will expel all foul humors from the system, and eradicate Scrofula, even in its worst form, having cured cases of twenty-five years' duration after all hope of cure had been abandoned. The best results are attained by applying externally to the parts affected, besides using it internally as directed.

A Faithful Friend.

SIRS,—I have great faith in your Burdock Blood Bitters, and can recommend it for most anything. Two years ago I was troubled with an ulcer on my ankle; having used B. B. B. for bad blood I procured a bottle, and a box of Burdock Healing Ointment. After using three bottles and three boxes I was completely cured, and can recommend it everywhere.

Yours truly,

MRS. WM. V. BOYD,

Brantford, Ont.

A French-Canadian Speaks.

(Translated from the French.)

GENTLEMEN,—I wish to acknowledge the good I have received from employing B. B. B. I was attacked by scrofula on the nose, and tried a multitude of remedies without any effect until I bought one bottle of B. B. B., which completely cured me. I very highly recommend it as a good medicine of guaranteed efficacy.

JOSEPH TREMBLAY,

159 College Street, Montreal.
