

Van Brunt

Made The John Deere Way

The **Van Brunt** line of grain drills is part of the John Deere line; the name "**Van Brunt**" stands for highest quality in the grain drill world, just as the name "**John Deere**" stands for highest quality in plows.

The highest grade farm tools are the most profitable to buy.

The purchaser of any farm tool wants satisfactory service above everything else. Only the highest grade implements give that service.

The farmer who buys a **Van Brunt** grain drill has the assurance that he is getting the latest and highest class of drill, which will give a long and satisfactory service.

Van Brunt drills are the result of years of experience in manufacture and field work. They are built from the best material, strong, light draft and do the highest grade work.

Call at the store of your nearest John Deere dealer. Look the **Van Brunt** drill over. Its many points of superiority will quickly appeal to you.

Made in 12, 14, 16, 18, 20, 22 and 24 sizes. Single, Double Discs or Shoes interchangeable.

Lighter Yet Stronger

The strong, light weight, light draft drill. Two to four hundred pounds lighter than any other type of drill. Why have your team haul around all day three or four hundred pounds unnecessary dead weight? It costs money to do this. Improved construction has done away with all unnecessary weight. Axles are strong and run from one wheel to the other—no sagging in the centre—Wheels stand up straight and do not lap over.

Adjustable Force Feed

The feeds are uniform. Each one deposits the same quantity at all times.

There is no leaking. The seed case is cast in one solid piece. All other parts are fitted into place accurately at the factory and made seed tight.

Feed can be regulated without changing the gears.

FORWARD DELIVERY

Seed is delivered near the centre of the disc where the furrow is wide open. Closed disc boots convey the seed down into the furrow without being deflected by coming in contact with the upward turn of the discs.

Van Brunt Drills

Will do first class work in soil that can be seeded, and will not clog or choke in mud, gumbo, sticky or trashy ground.
All Disc Bearings that wear out will be replaced free.

OTHER SUPERIOR FEATURES

Tilting levers provide for adjustment to suit different size of horses.

Double feed device. Each feed drives half the machine.

Gear drive—no chains to work loose or wear out.
