13. (a) Were you brought up on a farm ?		Until what age ?		(b) Have you worked on farm ?	
(c) Are you retired farmer ?		(d) Can you handle horses ?		How long ?	
(e) Are you willing to do farm work ?		Where ?		Drive tractors ?	
				Use farm machinery ?	
				During what periods ?	
I affirm that I have verified the above answers and that they are true					
Signature of Registrant					

Procedure of Registration

On June 22nd, every person residing in Canada, male or female, British or alien, of sixteen years or over, must attend one of the registration booths located in his or her district, and there observe the procedure explained below.

Where to Register

Every person required to register has the privilege of registering at any of the public places provided for that purpose. The location of all such places will be specified in proclamations posted conspicuously. In Cities and Towns, many of these places will be open for registration purposes prior to Registration day. Where such arrangements are made, the local papers will supply full information.

Large industrial and business concerns are being asked to provide facilities for registering their employees. Where they do so business will not be interfered with, and employees will suffer no loss of time.

While all are compelled to register on Registration Day, it is not contemplated by the Government to force the sick, feeble and aged to turn out. If such persons will notify the Registrar prior to June 22nd of their inability to attend at a place of registration, an effort will be made to register them at home, provided the request is reasonable and justified.

Remember the Day—June 22nd—Remember the Hours—7 a.m. to 10 p.m. Register early and get your Certificate for your own protection.

Issued by authority of

Canada Registration Board

by workable coal beds is estimated by D. B. Dowling, at 111,168 square miles, containing over 1,300,000 million tons of coal. For convenience in classifying, the coal fields may be divided into four main divisions, as follows:—

1. The Eastern Division, comprising the bituminous coal fields of Nova Scotia and New Brunswick.

2. The Central or Interior Division, comprising the lignites of Manitoba and Saskatchewan, and the lignites, sub-bituminous, bituminous and semi-anthracite coal fields of Alberta, as well as the bituminous coal fields of the Rocky mountains in south-eastern British Columbia.

3. The Pacific Coast Division, comprising the bituminous fields of Vancouver Island, the bituminous and semi-anthracite fuels of Queen Charlotte Island and the interior of British Columbia, and the lignites of Yukon.

4. The Northern Division, comprising the lignites and low-grade bituminous coal of the Arctic Mackenzie basin.

The coal-mining industry of Canada has developed at a very rapid rate. In 1874, the earliest year for which there is a reliable record, the production was 1,963,742 tons. In 1916, it amounted to about 14,500,000 tons. But in spite of this striking development, imports have increased faster than production. In 1916, they exceeded 17,000,000 tons, or over 53 per cent. of the total consumption for that year.

Screenings

Once upon a time two men were crossing a large field. When they were right in the middle of the field a big brindell bull came along to show them the nearest way to the fence. One of the men found a tree and climbed it as rapidly as possible. The other couldn't get to the tree in time, but seeing a large, sociable looking hole in the ground, he jumped into it.

The bull pretty nearly got him as he went down, but just missed him and jumped over the hole. The man came up again like a jack-in-the-box and the bull gave a snort and a jump at him. Down went the man and over went the bull, up came the man and back came the bull, till the man up in the tree got excited, and called down:—

"You bloomin' fool, you! Why don't you stay in that hole! You'll get that bull so mad he'll keep us here for a month."

"Is that so!" yelled the other angrily. "Lemme tell you something—there's a bear down that hole!"

"Ha!" said the detective. "This will be a very involved case. I see finger prints on every door and wall in the house."

"Guess again," replied the head of the house irreverently. "We have six children, and the only places you won't find finger prints are a few parts of the ceiling."

"Do you like your new little sister, Tommy?" asked the doctor.

"Oh, yes," replied Tommy. "She's all right, but there are a lot of things we needed more."

A stranger entered the grocery store of the small town and asked for all the stale eggs on hand. As he put the last one in the bag the grocer said facetiously:

"Looks as though you were going to see 'Hamlet' played tonight."

"No, sir," came the answer grimly. "I am going to play 'Hamlet' tonight."

The gimlet-eyed man, given to propounding conundrums, sprang a new one on a friend the other day.

"What," he asked, "is three-sevenths of chicken, two-thirds of cat, and one-half of goat?"

It was, of course, given up.

"Well," said the gimlet-eyed man, triumphantly, "the answer's Chicago. 'Chi' is three-sevenths of chicken; 'ca' is two-thirds of cat, and 'go' is one-half of 'goat.'"

Whereupon they threw him out of the place.

people, who for care to do their ducts and canned to those desiring.
