An eye thus afflicted we may get an idea of by squeezing a hollow rubber ball between the fingers, when we see it loses its rounded shape and is flatter one way than the other. Just so is the eye misshapen on its sur-face, though the change cannot be seen with the naked eye. This causes headaches, pains and redness of the eyes, dimness of sight, trouble in read ng; some people hold the head one sided to see best, and others say they never had a glass that suited them. That proposal, although agreed to in principle by the six powers, will not be enforced in the form interpreted by Lord Salisbury in the House of Lords on Thursday. Athens. Feb. 28.—A number of Cretan deputies, headed by the Bishop of Retimo, visited King George to-day and presented to him a memorial, which in effect declared that the establishment of an autopomous Government in Crete would not result in the pacification of the island. Such a form of Government would notly prepare the way to a fresh revolution and further endanger the peace of Europe. The Cretans, therefore, had firmly decided not to accept autonomy, but to continue their struggle to realize union with Greece, which the memorialists added even the Mussulmans were beginning to agree was the only practical solution of the question.
