STOPPED BY "DUMPING"

LONDON, June 17.-A deputation re esenting the trade union workers af-ected by the stoppage of the steel yorks of the Ebbow-Vale company was received by the managing director, Mr. Mills, this week. He stated that in the present year things had taken a serious turn owing to dumping. While 300,000 tons of steel bars had been dumped into Newport in the years 1908, 1909 and 1910, at the rate of dumping in the present year 1911 would show the previous quantity. He had had conversations with prominent manufac ersations with prominent manufac-neers of steel ralls in America and Ger-many, and they had made it clear to him that at whatever price the manu-facturers of this country were prepared to sell steel bars, they were determined

to capture the trade by selling them at least \$1.25 per ton less. "Under these circumstances," said Mr. Specifications Drawn So Inthat the works should stop until better prices prevailed in the market. He had no intention of asking the workmen to accept any reduction of wages, for a 25 per cent. reduction would not meet the present difficulty. He anticipated that the works would stand idle for at

least three months unless something extraordinary happened."
