"This breed of pigs has been generally considered to be one of the best in England, on account of its smallness of bone, early on account of its smallness of bone, early maturity, aptitude to fatten on little food, hardihood, and the females being such good breeders. Although termed the Berkshire breed, these pigs have been reared in various parts of the kingdom; and some of the very best have come from Staffordshire; from the progeny of the celebrated Tanworth boar. In Leicestershire, also, is a very fine race of them. descending from very fine race of them, descending from the stock of RICHARD ASTLEY, Esq., who devoted much care to the improvement of

the Berkshire pigs.

"Hogs of the pure original breed have been known to attain to an immense size. and weigh as much as 800 to 950 pounds. One bred at Petworth measured seven feet seven inches from the tip of his snout to the root of his tail, and seven feet ten inches in girth round the centre; five feet around the neck, ten inches round the thinnest part of the hind leg, and two feet across the widest part of the back. He stood three feet nine inches high; and, what was most remarkable in this mon strous animal, he did not consume more than two bushels and three pecks of ground oats, peas and barley per week.

oats, peas and barley per week.

"Parkinson, in his Live Stock, vol. ii.,
gives some extraordinary accounts of the
size and weight attained by individuals of
this breed, and the profit yielded by them
and also of their aptitude to fatten at grass. They are not, however, generally of an enormous size, being much smaller than several of the older breeds; their ordinary weight averages from 250 to 300 pound ne will at two years old weigh 400 They have been greatly improved by a cross with the Chinese and Neapolitan breeds, reducing them somewhot in size,

but increasing their early maturity and aptitude to fatten. The cross is also said to have improved the flavor of the flesh, and rendered it more delicate.

Some years ago in this country there was a Berkshire fever, and interested individuals raised the anticipation of farmers, in regard to the Berkshire, higher than the character of this or any other breed could meet. The assequence was, that a reaction speedily place, and the Berkshire has been as ch underrated, as its advocates overrated Still, taking it all in all, there are few, f any, better breeds of British swine, than the Berkshire. Its meat is not so fat as that of some other breeds, and on this account is not so well adapted for barreling; but for bacon, which is exported to Eng-land in considerable quantity, and might be to a still greater extent, this lean-meated quality is an advantage rather than a detri-nent. For fresh pork, the Berkshire are good, but perhaps not quite equal to the improved Essex, Suffolks, or Middlesex, though being of larger size they are pre-

A Herd of Heavy Cattle.

For a year or two past there has been a spirited competition between some of great stock farmers of Illinois. The object being to produce the heaviest herd of cattle of 100 head.

In the spring of 1855, B. F. Harris, of Champaign county, sold one hundred head cattle, the average weight of whi Determined to improve on these weights

but in the generous and manly spini of competition which is always productive of great results, Mr. Rufus Calef and Henry Jacoby, both neighbors of Mr. Harris, and large and opulent stock farmers, joined forces, and shipped in the spring of 1855, one hundred fat cattle, the average weight of which was 2,090 lbs., thus leading Harris 125 lbs. to the bullock.

Society, was called upon to attend the weighing of another herd of 100 head, belonging to Mr. Harris. The aggregate weight of the heard was 1183-5 tons, or 2,372 pounds each! Twenty-five of the best and fattest averaged 2,662 pounds each., "The Baby" of the twenty-five kicked the beam at 2,876 lbs. They were so fat that three days were required to drive them to the station 14 miles dis-

The average age of the 100 is less than five years. Not one has ever been housed a day in his life; a half dozen pairs only have been yoked, and a less number orked. They have been pastured and erded on the prairies in the summer, and in the winter fed on corn in the shock and und timothy, and yarded along the skirts of the Sangamon timber.
It is said that Mr. Harris is likely to realize from \$18,000 to \$20,000 for the lot.

THE VALUE OF SKIMMED MILK.—The value of what passes under the name of "dairy slop"—which is skimmed milk, whey and buttermilk—is not always reckoned at as much as it is worth. Mr. War-20th, 1854, and the pork brought from seven to eight cents a pound. The aggregate weight was 1,7231 lbs., which brought \$135.04. Besides the meal or corn, the pigs had the skimmed milk and buttermilk of six cows. Deducting the value of the corn, and the first cost of the pigs, \$60.54, we have \$71.50 as the value of the skimmed milk and buttermilk—equal to \$11.91 for each cow for a year .- Boston Culti-

Hovey's Seedling Strawberry vs. McAvoy's Superior.—At a recent meeting of the Cincinnati Horticultural Society, N. REMEDY FOR EWES DESERTING THEIR LAMBS.—Let a dog bark at and teaze the lamb in the presence of the ewe, and all the natural instinct of affection of the mother will be aroused.

ABORTION AMONG Cows .- Earl Spencer says, that since he placed lumps of rock salt in his pasture lands, none of his cows have suffered abortion.

Turns, May 9.

Cavour and the Marquis de Villa Marina to the Chamber shows—that Austria having, at the Conferences, refused to discuss the condition of Italy, Sardania, as the only state which offers a barrier to revolution, demands the co-operation of England and France in carrying out reforms. It shows that the evils of Austrian occupation are opposed to the interests of Italy and Euorpe, and contrary to treaty, humanity, and justice. Finally, the memorandum calls on England and France to unite with Sardania in the application of efficacious remedies.

W. & R. Simson & Co's. importations this year are much larger, and more varied in their character than usual, particularly the improved Swedish Seed, Purple Top, being the fifth annual importation direct from the grower 'Geo. Hope, Esq., of Fenton Barns, East Lothian, Scotland,' and with respect to this very productive Seed, the character of which is now established. We feel greater confidence than ever in recommending their importation, this year to the notice of Farmers. On referring to the North British Agricultural newspaper, dated Edinburgh 28th Dec., 1854—we find that at the United East Lothian Agricultural Society, annual Show of Roots held in Haddington, the following extract from the report of the proceedings of that Society, viz:

The marked success which attended the Root Shows, and which was fully sustained at the Show in Dec. 1854, having induced the Committee to place on their list of premiums, a sweepstake of ten shillings, with one pound given the committee to the shillings of the shillings. en by the Society, for the best five acres of Swedish Turnips, eleven members dish Turnips, eleven members from various parts of the country became competitors. The Judge after taking much pains, and devoting near

ored, awarded the stake to Mr. Hope of Fenton Barns.
We simply quote this fact to show the quality and kind of Turnips, and the rank they hold in the opinion of Judges, in one of the best Agricultural counties in Scotland. Agricultural counties in Scotland.

As it is the Seed grown from these roots that
we have been so successful for the last five years,
in introducing into this country, and have induced the farmers in the country of Middlesex to
