

## In Some Cases

Three of a kind beat two pair, but here's only one pair, and it will beat any two of a kind made!

Sows the seed sure and packs it.

Cuts the weeds sure and kills them.

What's Left? A Fine Root Crop!

## Model Scuffler

LIGHT AND STRONG

QUICKLY ADJUSTED.

We aim to make an implement which will adjust itself to all the varying conditions of the soil in the quickest possible manner, and with the least manipulation. We accomplish this by our new patented shank fastener. The change is made by loosening one nut half a turn, by which operation the point can be shifted to any desirable position. This Scuffler is what many of our customers have already termed it - "a world beater." It is strong, durable, and of the best material and workmanship.

No better wire fence built than the Casey Diamond Grip, Pat. Just the thing for farmers - neat, strong, and durable. Will last a lifetime, barring accidents. Uses only straight wires, with no little depression as not to cause the galvanize to crack or peel. If there is a dealer who wants something better to handle than he's had, try it. We also supply the Double Lock Wire Fence, which is claimed by some to be second to none, the lateral wire of which, as well as the upright stay, being crimped at joints. Our Agents build either on premises. Agents wanted everywhere in Canada, to whom sole territory will be allotted. County and township rights for sale. Our Gas Pipe Frame Gate takes the lead. No better or cheaper place in the city to get plain or fancy turning done. Call on, or address,

The W. A. Freeman Co.,

Hamilton, Ont.

Gentlemen:

Last year I experimented with your "Potato Manure," and with sulphate of potash on poor, sandy land, which had been dressed with wood ashes the previous year, with results as follows:

Two rows potatoes without fertilizer yield slightly under one bushel.

Two rows, same length, about 25 lbs. sulphate potash, yield slightly over one bushel.

Two rows, same length, alongside the others, with about 10 lbs. of your "Potato Manure," yield about 2 1/2 bushels.

The potatoes were planted about the middle of June, during the drought.
