Manufacturers of

Bobbins and Spools

OF EVERY DESCRIPTION

For Woolen, Cotton and Rope Mills. Extra facilities for
 supplying new mills and filling large orders.

Correspondence Solicited.

Orders Promptly Filled.

—The Agricultural Department at Hawaii has been making experiments with the plant called olona, which seems likely to become an important textile. It belongs to the nettle family, and has no resin. Ordinarily sized ropes made of olona fibre are silken in their fineness, and as strong as a ship's hawser. Ropes, nets and fishing lines are found to be impervious to the action of salt water. Olona is also remarkably light, strands that weigh no more than twine having the strength of wire. Garments woven of this fibre, though delicate in texture, are said to be almost indestructible, and with ordinary use will outlast the lifetime of the wearer. Olona thrives best in tropical forests 2,000 feet above sea level.

THE NEW

French Shoddy Picker Machine

SUPERIOR TO ALL OTHERS.

High Test Awarded at Paris Exposition, 1900.

OF SILK, WOOL, COTTON, WASTE, JUTE, etc., it will
 produce fifty per cent. more production than the Garnett
 Machine on one-half the power.—Has no rival on the market.

Toronto Woollen Machinery Company

118 DUKE STREET, TORONTO.
