

## A GIRL'S NARROW ESCAPE.

HER FRIENDS DID NOT THINK SHE COULD RECOVER.

A Case Where the Expression "Snatched From the Grave" May be Most Appropriately Used—A Story Worthy of a Careful Perusal by Parents.

(From the Penetanguishene Herald.)

A few evenings ago a representative of the Herald while in conversation with Mr. James McLean, fireman on the steamer Manitou, which plies between here, Midland and Parry Sound, learned the particulars of a case which adds another to the long list of triumphs of a well-known Canadian remedy, and is of sufficient importance to deserve widespread publication for the benefit it may prove to others. The case referred to is the remarkable restoration to health of Mr. McLean's daughter Agnes, 13 years of age, who had been so low that her recovery was deemed almost impossible.

Miss McLean's condition was that of very many other girls throughout the land. Her blood had become impoverished, giving rise to palpitation of the heart, dizziness, severe headache, extremely pale complexion and general debility. At this period Miss McLean was residing in Midland, and her condition became so bad that she was finally compelled to take to her bed. A doctor was called in, but she did not improve under his treatment and another was then consulted, but without any better results. She had become so weak that her father had no hopes of her recovery and did not think she would live three months. The lady with whom Miss McLean was residing urged the use of Dr. Williams' Pink Pills, and finally a supply was secured. Before the first box was all gone an improvement could be noticed in the girl's condition, and by the time another box had been used the color was beginning to come back to her cheeks, and her appetite was returning. The use of Pink Pills was still continued, each day now adding to her health and strength, until finally she was restored to perfect health, and has gained in weight and she now weighs 140 pounds. Mr. McLean says he is convinced that Dr. Williams' Pink Pills saved his daughter's life, and he believes them to be the best remedy in the world, and does not hesitate to advise their use in all similar cases.

The facts above related are important to parents, as there are many young girls just budding into womanhood, whose condition is, to say the least, more critical than their parents imagine. Their complexion is pale and waxy in appearance, troubled with heart palpitation, headaches, shortness of breath on the slightest exercise, faintness and other distressing symptoms which in variably lead to a premature grave unless prompt steps are taken to bring about a natural condition of health. In this emergency no remedy yet discovered can supply the place of Dr. Williams' Pink Pills, which build anew the blood, strengthen the nerves and restore the glow of health to pale and sallow cheeks. They are certain cure for all troubles peculiar to the female system, young or old. Pink Pills also cure such diseases as rheumatism, neuralgia, partial paralysis, locomotor ataxia, St. Vitus' dance, nervous headache, nervous prostration, the after effects of la grippe, influenza, and severe colds, diseases depending upon humors in the blood, such as scrofula, chronic erysipelas, etc. In the case of men they effect a radical cure in all cases arising from mental worry, overwork or excesses of any nature.

Dr. Williams' Pink Pills are sold only in boxes bearing the firm's trade mark. They are never sold in bulk, or by the dozen or hundred, and any dealer who offers substitutes in this form is trying to defraud you and should be avoided. The public are also cautioned against all other so-called blood builders and nerve tonics, put up in similar form intended to deceive. Ask your dealer for Dr. Williams' Pink Pills for Pale People and refuse all imitations and substitutes.

These pills are manufactured by the Dr. Williams' Medicine Company, Brockville, Ontario, and Schenectady, N.Y., and may be had of all druggists or direct by mail from Dr. Williams' Medicine Company from either address, at 50 cents a box, or six boxes for \$2.50. The price at which these pills are sold makes a course of treatment comparatively inexpensive as compared with other remedies or medical treatment.

## WITH THE FARMER.

POINTS OF USEFUL INFORMATION CONCERNING THE INTERESTS OF THE FARM.

It never increases the milk supply to pitch milk stools at the cows or to swear at them.

When water can be brought into the barn it is an easy matter to bring it to a proper temperature before watering the animals.

Theoretically cows need watering twice a day in winter, but in practice once a day seems to be just as good.

An exchange says bran fed to cows makes the cream harder to churn and requires longer for the operation. It works the other way for us.

Too much washing of butter occasions a loss of flavor. Freezing damages butter, but if it is to be held long in storage it is better to freeze it, as it will go off flavor faster when held unfrozen.

Perhaps one of the things needed about your place this winter is an ice-house; if so do not wait till the crop is ripe and wasted before building the house—build it now.

No man was ever a poorer farmer because he possessed a liberal education. If you want to make your boy a really good farmer, better if possible than his father, do not stint schooling.

Look out for the man that wants to sell you the "right" to get more butter out of milk than the cow put in it. Take the right to get out all there is in it, but pay no royalty for doing it.

At present Florida ships nearly twice as many oranges as California. It is estimated that the growers received about \$1,600,000 for their crop, while the transportation companies were paid \$2,400,000.

Pay some attention to what your neighbor is doing, not being jealous of his success, but endeavoring to profit by it. It is quite likely he knows how to do some things better than you; and maybe you can give him a pointer or two in exchange.

Do not think that the winter is a season for leisure only upon the farm. When it is so regarded leisure becomes only another name for loafing. Study, read, plan, think and fit yourself to be a better farmer next year than you have ever been. There is room for improvement.

In some of the great cattle-producing sections, where once nothing was thought of but stock, owners are now combining farming with their stock growing. This combination is true agriculture. Either branch by itself lacks something of its completeness.
