

Special Tuberculin Offer

The value of Tuberculin as a diagnostic test for tuberculosis is generally recognized. We prepare

TUBERCULIN OINTMENT for the cutaneous test

TUBERCULIN, OLD, in capillary tubes for the von Pirquet Test

TUBERCULIN, OLD, for the subcutaneous test

The consensus of opinion appears to be that:

"The von Pirquet Cutaneous Test is the most suitable method for general use, and is absolutely harmless. It is the only test required for children, because a positive result is more significant of a recent infection and occurs less often in apparent health under the age of twelve. Other methods may be needed in adults to confirm the result of a cutaneous test, but it can be applied as a preliminary method in all cases with advantage."

Journal American Medical Association, January 22, 1910, Folio 261.

Correspondence with many clinicians leads us to believe that for therapeutic use Bacillen Emulsion or Bouillon Filtrate are preferable.

We make the following

Special Tuberculin Offer

On receipt of **\$2.00** with name of your druggist
we will forward, charges prepaid,

	Regular Prices
1 Tuberculin and Bacterial Vaccine Syringe	\$2.00
