

German sociological writings. Dr. Hughes is particularly interested in the study of modern social institutions and social movements.

Mrs. Hughes is a candidate for the Ph.D. degree in Sociology and Anthropology at the University of Chicago. (She is interested in the sociology of the newspaper and in various phases of the study of the community.) In return for a small nominal fee she is giving some of her time as research assistant at McGill University. She might receive a more important place in the research work of the Department if the university chooses to make this possible.)

Dr. Dawson is interested in community studies, immigration, and in studies of Canadian culture and social organization.

The Department is very much in need of an additional professor who would have as his special subjects Social Pathology, Criminology and Statistics as applied to sociological research. This would add much to the effectiveness of the Department as it would enable each of the other members of the Department to carry on the work for which he is best fitted. Such an addition to the staff would give each instructor more time, so essential in good teaching and effective research.

(2) The needs of the Department as regards equipment, space, etc.

We have one room for an office, in which the staff of the School for Social Workers, its secretary, and the staff of the Department of Sociology are crowded. The Department of Psychology has loaned us one of their small laboratory rooms, temporarily. We need a suite of rooms similar to those possessed by the other older departments. Our work is very much handicapped for lack of space.

We need \$500. a year for the purchase of research equipment.

We need \$2000. a year for the collecting of social facts, etc., in connection with our research projects. Some discussion of these research projects will appear below in this report. The point should be kept in mind that our money is not spent in a costly laboratory equipment but in machinery for gathering social facts outside the university.

(3) Scholarship needs.

A- Undergraduate: A scholarship of \$300. a year during the third and fourth years for the person who leads in the work of the Department during the sophomore year. This would stimulate more interest in the work of the Department and it would encourage an even higher grade of work on the part of the best students.

B- Two graduate scholarships of \$600. a year each to increase interest in our graduate work and enable us to train the personnel for our research projects. We have a new field for sociological study in Canada and it has been exploited hardly at all. Surely the study of Canadian social life, culture, etc., can have in time a very important practical bearing on the solution of social problems in Canada!

Publications.

Besides articles to Journals, two members of the Department have pre-
