THE THRALL OF LEIF THE LUCKY

A Story of Viking Days
By OTTILIE A. LILJENCRANTZ

REMARKABLE book because it not only tells an unusual and fascinating story, with a novel and seldom used — and therefore interesting — historical background, but it was everywhere declared "the most beautiful book of fiction of 1902." The striking appearance of the volume is due to the appropriate character of the type, initials, end papers, etc., and to the wonderful pictures in color. It is the story of Alwin, the son of an English earl, and how he served the great Leif Ericsson on his famous voyage to the New World, and how he finally won his freedom and the beautiful Helga by his own high courage.

CRITICAL COMMENTS

One takes up the volume idly, with the half-formed hope that it may contain something out of the beaten track; one reads the first chapter in a mood of indulgent tolerance, and then, all of a sudden, the book has quietly laid hold upon the reader and keeps its hold tenaciously to the closing page. — *New York Commercial Advertiser*.

Nearer to absolute novelty than any book published this Spring. — *New York World*.

The most beautifully illustrated and artistically ornamented \$1.50 romance published this year. — *New York Journal*.

A tale which moves among stalwart men, and in the palaces of leaders. — *New York Mail and Express*.

One of the best constructed historical romances that has appeared in America in some years. — *Brooklyn Eagle*.

The atmosphere of the old days of fighting and adventure glows in the book. — *Springfield Republican*.
