DIRECTIONS to the BOOKBINDERS for placing the CUTS to MILLAR'S NOW, COMPLETE and UNIVERSAL SYSTEM OF GEOGRAPHY.

Though we would recommend this work in general to be bound in one volume, yet, to accommodate those who prefer it in two, the binder is defired to divide the volumes between the fignatures y and z Z: He is defired also to place the leaf (given in No. 80 with the second volume title) with the pages 401 and 402 with a *, containing the conclusion of our description of Russia, between the fignatures of H and 6 I. Also place the Introduction at this end of the Profess.

N. B. This work must be best before the copper plates are placed, in order to prevent the letter prefs from fetting off, and thereby spoiling the engravings, which are to be placed as follow:
