CHICAGO, Sept. 19 .- Prevalence of mar- large. The outlook for the HICAGO, Sept. 19.—Prevalence of mari law in Spain and Vienna had a part
making the wheat market to-day firm,
e close was %c net higher for the acte months, but %c off for September,
rn finished %c to %c lower than last
ght, oats up a shade to %c to %c, and
e products varying from 20c decline to

the spanish and developed in the raising of the German bank rate.

Evidence that the Canadian farmers were storing their wheat until after the settlement of the reciprocity issue had a far from calming effect on the bulls, although the statement that an affirmative vote in Canada had already been pretty well discounted, and prices were now practically adjusted to the change. The market closed steady at almost the top figures of the day. During the session December ranged at from 94% to 35%.

Because of poorness of shipping demand, and owing to free selling by local longs, corn suffered quite a setback. The decilne, however, stimulated new investment, and resulted, too, in considerable export business. December fluctuated between 63% to 63% and 64%, closing steady at 64c, a net loss of 3c. Cash grades were easy.

Oats made a gain for the day as the result largely of the fact that sellers over-reached themselves and had to bid against each other when railies occurred in corn and wheat. High and low levels touched by December were 65% and 44%c, with the close a shade up, at 5% to 45%c. Talk that some of the European countries would be forced to reduce or remove import duties had a bracing effect on provisions, but also afforded a fine chance for seliers. The outcome was mixed—pork down 20c, to 17%c up, and other products running from last night's figures to 12%c decline.

Liverpool Wheat Market.

LIVERPOOL, Sept. 19.—Wheat—After opening ½c higher, the market showed a further steady underione with an additional advance on the firmness of Canacian offers. The near month eased ½c, with pressure of stocks, and this caused some realizing in the distant months, which declined from the high of the merning. Russian offers were larger, and the weakness in Paris at the opening, together with lower continental bids, induced profit taking. The market closed firm, %c to %c higher than yesterday, with covering by shorts on a continued millers demand, and the firmness of cargo offers. Liverpool Wheat Market.

Winnipeg Grain Market.

Winnipeg Grain Market.

Winnipeg Sept. 13.—Cables came stronger at the close of the Liverpool market. By far the most bullish influence which caused the advance was the prediction of frost for Wednesday night, and this, after so much rarin, might do damage where drying had not taken place. Over night, however, the weather had improved and in the whole of the west there were only five places which reported light showers. Some of the temperatures were very low, and in some cases down to thirty degrees. Primary receipts showed a decrease as compared with the corresponding day last year. There was a good demand for all grades of cash wheat, but the supply is limited, farmers not being disposed to sell. Exporters said the market was two cents out of line and would be more so towards the close. Winnipeg advanced ½c to ½c on the situation after a good rarnge of one cent. Oats were also active, Winnipeg closing ½c to ¾c stronger.
