In the very near future we shall offer for investment the Treasury Stock of the MARTIN PORCUPINE MINES, LIMITED, now in process of organization. We have been familiar with the Porcupine District since its first discovery. We have been advised by the most eminent Engineers relative to progress made, and we have never advised our clients, our friends, or the world at large, relative to the purchase of PORCUPINE stock.

We know personally the original owners of the MARTIN property. We know they are representative men who stand well in the various communities in which they live. We know that the administration of this Company's affairs will always be upon the highest business principles.

We are firm in the belief that the stock will prove to be a sound investment, surrounded by wonderful speculative profit possibilities.

The owners of the MARTIN property have refused comparatively large amounts of money for the property, feeling confident that development on the surrounding properties would amply justify them in making a flotation, to develop the property, and to participate in the big profits derived from stock ownership. They are about to transfer the MARTIN property to the Company now being incorporated in consideration of stock, and their stock

The proceeds of the sale of Treasury Stock will be devoted to aggressive development of the property.

We are advised that the mine operations will be in charge of John W. Wilson, E. M., and we know Mr. Wilson personally; have confidence in his ability as a mine maker. He is a conservative and conscientious Engineer of mines, an expert practical miner, who has had experience in Africa, Australia, New Zealand. Manchuria and also in Porcupine.

We shall offer the stock full of confidence in its future. We shall advise our clients, our friends and the world at large to buy it, to put it away and to hold it as an investment. All of the surrounding properties are being developed aggressively and strikes of high grade gold ore are reported frequently. We have just been advised from Porcupine that the "Preston East Dome Mines, Limited," has just made a rich strike in No. 2 Shaft. This Shaft is located near the "Brydges" claim located directly south of the MARTIN. On the "Brydges" property, now called the "Little Pet," Col. Weatherly has recently reported a spectacular strike of rich gold ore.

The development on the "Preston East Dome" ground, lying directly east of the MARTIN claim, is reported to be most favorable. The development on the "Big Dome," directly north of the MARTIN property, has been so widely advertised that it is not necessary to dwell on the subject. The "Big Dome" Company, at the present time, is working approximately 400 men in mine development and the erection of a great reduction plant. No work has been done on the Government "Vet." lying directly west of the MARTIN ground, but it is reported that this ground will be developed in

As quickly as incorporation and organization is complete, we shall announce the initial offering of Treasury Shares.

Correspond with us at once, and as quickly as papers are ready, we shall he pleased to furnish you with full details and prospectus.

MONTREAL GRAIN PRICES

Active Demand From European Sources for All Manitobas.

MONTREAL, Nov. 21.—The demand from European sources for all grades of Manitoba spring wheat was active againto-day at a further advance in prices of 3d to 5d per quarter, and sales of over 200,000 bushels were made for December-January shipment. There were bids in the market for much more, but exporters were not in a position to accept them. were booked by local exporters some time ago, have been cancelled during the past two days by foreign buyers at a good profit to shippers here, as they have soid the oats on spot for local consumption. American coru on spot is scarce and strong, and prices have advanced 1½co per bushel.

per bushel.

There was considerable inquiry from foreign buyers for spring wheat flour, but millers state that the prices bid were not in all cases satisfactory, and only a small volume of business was done. The local trade is fairly active and firm. Demand for millfeed continues good. Cheese is quiet; butter in good demand; eggs fairly active.
