KING STREET

deorge E. Foster, ex-Minister of Finance, is president of a company of Winnipeg and other gentlemen who have bought out the Olive gold mine, near Mine Centre in the Scine River district of Ontario. According to all accounts this property is a wonder, the ore being so rich that in eight of nine months the little two-stamp mill upon thas pounded out over \$13,000 in gold. The quartz is said to run \$40 to the ton, free-milling. Mr. Foster recently left Rat Portage to look at the mine upon which he is having erected a ten-stamp mill. With the increased capacity the Olive expected to do wonders.

Sectorday The World had a call from Mr. W. Treat of New York, secretary of the Island we have the company, is a secretary better.

In the upper tunnel the crosscut near the bottom of the old shaft has shown four feet of arsenical ore, carrying shipping values. In the lower tunnel the crosscut is going actively ahead to tap the same chute with depth. Roy E. Clarke, the engineer for the company, is well astisfied with the showing. It is hoped that arrangements can be made whereby a vertical shaft will be sunk to open the property more thoroughly and systematically than is possible with the present prospecting tunnels.

Keystone—A force of men resumed work early in the week. This property is in the horthern part of Trail Creek Division and has one of the greatest surface showings in the district. The ore has gone from a trace on the surface till it assays \$12 in gold a short distance in. Work on this property is to be continued during the fall and winter.

The Sentinel.

Dr. E. E. King has just returned from the Lake of the Woods country, whither he went to examine the Sentinel gold mine. This property, which is located on the north shore of Shoal Lake, about three miles west of Ash Rapids, is owned by the Sentinel Consolidated Gold Mining Company of this city, of which the Doctor is president. After seeing the claim Dr. King comes back elated over the outlook, and carrying a satchelful of ore showing plenty of visible free gold. A shaft is down 70 feet on the claim, and at that depth the vein, which was two feet wide at the surface, has widened out to 5 feet \$\frac{1}{2}\$ inches. A second shaft is being sunk on a parallel vein a few feet away, which, from its dip, bids fair to unite with the first lode at a depth of about 120 feet. Assays of the ore run from \$20 to \$34 to the ton. Mr. N. B. Bagen, secretary of the company, is still on the location. The Sentinel.

Many Didn't Touch Him. Yesterday Magistrate Denison dismissed the charge of theft preferred against Mary Higgins by Robert Hutcheson, a stranger in town.
