WHEAT FELL ONE MORE CENT

Slump in Chicago Futures Continues Merrily.

Paris wheat was unchanged to-day, with flour steady to 5 centimes off.

The World's comments on the recent forced bull movement in the price of Chicago wheat have been proven well founded. Chicago futures continued on the down grade to-day, and the market recorded a recession of still another cent, making in all a drop of over 5c per bushel for the week ended to-day. New York and St. Louis both sold and there was little or no encouraging news floating around.

the meteorological conditions that have prevailed in many of the winter wheat producing States, the reports of the condition are very encouraging. The farmers in the systing wheat States think that a cold winter tends to ensure larger crops, on the theory that the frost gets deeper into the soil, and, upon thawing, helps to pulverize it more thoroughly. The St. Louis correspondent of The Northwestern Miller says that a firm representing a line of elegators in the Southwest reports much larger farmers' deliveries. Farmers are disappointed that the expected advance has not been realized and the wheat crop in that section shows no serious damage.

STOCK MARKETS OF 9 WEEK

Fluctuations in Canadian and American Issues.

War Eagle, Carlhoo and General Electrics Have Made Good Advances for the Week on the Lo-Lower.

Canadian securities have exhibited some irregularity during the past week. They opened up on Monday with a continuation of the strength previously shown, and sharp advances were made in Dominion, imperial and Oniario Bank, War Eagle and other issues. There followed about the middle of the week a natural temporary reaction of what has been something of a bull market. Cable, Richelleu and War Eagle declined, but the list became firm again to-day, and the market closed rather buoyant. Cariboo is now quoted at 151½, its record figure, and 9 points higher than a week ago. General Electrics have risen 8 points since Saturday last, but retain an advance of only 5½ points for the week. The price of War Eagle reflects an appreciation of seven notches, and C. P. R. and Bell Telephone are strong. C.P.R., on its excellent earnings and prospective good year, is getting a good deal of support. Issues newly listed on the Montreal Exchange are those of the Twin City Rapid Transit Co., of St. Paul and Minneapolis, and that of the Payne silver mine of the Slocan. B. C. The former has been actively dealt in and the latter holds firm at \$3.30 bid for shares of a par value of \$2.50.

Cables from London to Messers, A. E. Ames & Co. to-day give the following quotations: Grand Trunk 4's, 82; Grand Trunk firsts, 71½, and Grand Trunk seconds, 47%, closing at 47%.

Canadian Pacific Railway earnings for the fourth week of January increased \$56,000 over the same week last year. Grand Trunk earnings for the fourth week of January increased \$40,163.

The earnings of the Twin City Rapid Transit Company have increased steadily from \$65,157,60 twenty-one years ago (i.e., in 1878) to \$2,145,000 in 1898. Last year's earnings increased \$19 per cent. over those of 1837, the total for the latter year (1897) having been \$1,982,785.20. The average gross earnings for the past four years have been \$2,055,300, and the average operating expenses \$993,200, leaving average net earnings of \$1,056,000. Average interest and tax charges for the four years totalled \$603,400, leaving surplus earnings of \$452,700. The 7 per cent. dividend on the outstanding preferred stock is put at \$172,354 per annum, which leaves an average surplus for the common stock for each of the four years of \$280,346. Of the \$17,000, 000 of common stock, \$15,000,000 has been issued, and of the \$3,000,000 preferred stock, \$2,642,000 has been issued, the remainder being still in the treasury.
