Able Addresses Mark the **Opening of the Law School**.

Dr. Ian C. Hannah and H. A. Powell, K. C., Spoke at the Gathering in the Equity Court Room-Some Very Interesting Facts Related.

School was formally opened Tuesday evening in the Equity Court rooms, when two very able and interesting addresses to the students were given. There are a number of new students this year, among whom are Renfrew Howard, J. Earle Logan, Jas. P. Lunney, William Fugsley, Harold Robinson and W. B. Ferris, Quite a large audience was present at the meeting. Dr. Silas Alward, dean of the law school, presided, and in opening the meeting said that the school was start- supremacy between the civil and ing this term under more favorable ircumstances than ever before. There are fifteen undergraduates this year. The school has been in existence for Yourteen years; the first graduates were in 1895, and since then thirty-five of the students have received the degree of B. C. L Previous to the founding of this school, young men of St. John went to Harvard or elsewhere. Now they stay at home and get just as good a course. Comparing the preent opportunities with the days when the speaker was a student, it must be said that for the young men of today the lines have fallen in pleasant places. These young men have the advantage of all the knowledge of the most exced members of the bar. Dr. Hannah, president of Kings, and H. A. Powell will address you. The Chief Justice has been unable to attend. He had intended contrasting conditions of the present day with those when he was a student.

DR. HANNAH.

President Hannah asked in what spirit should a young man enter upon the study of law. The profession should not be made only a means of livelihood, it should be respected, for law is a noble thing, bringing the world from the darkness of the past to the brightness and justice of modern civilization. I think that Oxford and Cambridge did perfectly right in mak-The law a necessary part of a liberal education. And now the highest degree that Oxford can give is in civil I think, too, that it is wise to include in our law course the study of Roman law, as it is the origin of our own common law. It has time and again been appealed to for proper interpretation of our present day prob-It is also the authority of international law, and, in fact, of every anch of our rea

The 1905-06 term of the St. John Law | life. It is not supported by the common sense views of our business men The customs of our forefathers is the basis of the present English law, which developed as the nation grew. The Normans brought us trial by jury not the Saxons, as the school histories say. The Normans modified the early ms. William the Conqueror, the custo greatest administrator England ever knew, endeavored to introduce what England is even now struggling to adopt - the system of land registration. The Doomsday Book was the be ginning made by him. Mr. Powell traced the struggle for ecclesiastical powers, showing how common law came out the winner, and how at the time of Edward First it had reached a high state of perfection. England's great jurists, by seeking from every source the best thoughts and principles, have through time pieced together that noble monument of the present day, the great common

law inheritance of the English race. It is so firmly adjusted to our moral sentiments, to our business habits, that we do not realize the existence of this enormous mass of jurisprudence until section the machinery of the law is set in motion. Every great race has had a mission. Egypt laid the foundation of science, Greece of art and literature, Rome of law. England's mission is to teach the world the blessing of freedom. No more certainly was Egypt the mother of science, Greece the mother of art and literature, or Rome the mother of law, than has England been the mother of political liberty. No nation today in the world enjoys

the blessings of self government but political liberty. My advice to young men is to look

upon law as a magnificent science, to study it as a science, and to read the lives of its greatest exponents. Among these leaders I would mention Hardwicke (York), ont of the greatest when necessary. of his profession who ever lived; It is understood that an important Eldon (Scott), who was chancellor for appointment has been made by the dothe longest time that the woolsack was held by any man; Stole, his the winter steamers. R. Vernon Longbrother, stands as the greatest expon- worth, late of the Bank of Nova Sco ent of admiralty law ever known. Mansfield (John Murray) is another the marine wharf and the oversight of great name. He stands alone, and has the men engaged in loading and disdone more for English common law even than Eldon and Hardwicke have here and at Georgetown. This, it is are slow in choosing either physician year temperately, was kept as a day of done for equity. CHARLOTTETOWN, Nov. 15 .- Nei McAskill, aged 60, unmarried, a well known farmer living at Tracadie Head, was found dead in his bed at that place yesterday. McAskill had recently been ill with inflammation of the lungs, but has been up and around for the past three weeks. On Monday evening he was around as usual, and went to bed without complaint of anything wrong.

A sad accident occurred at Radner, Alberta, on Oct. 29, when J. J. Bruce, formerly of Valleyfield, P. E. I., met his death. While going over his section of the railroad with his two men, an eastbound passenger train on the C. P. R. suddenly appeared around a curve. The two section men themselves by jumping, but the train struck the section handcar and Mr. Bruce was instantly killed. The deceased had been employed on the C. P. R. for over twenty years, part of that time as road master and latterly as foreman. The accident occurred three miles from his home. At a meeting of the executive of the P. E. I. Sunday School Association held at Summerside, the course of normal training used in New Brunswick was adopted. The new field secretary, Rev.

J. B. Ganong, agreed to attend a convention in each of the fifteen districts in P. E. I. next summer. Rev. F. A. Wightman was appointed associate editor of the Advocate, the official organ of the amalgamated associations. lit her lamp from England's torch of Rev. W. W. Lodge, J. K. Ross and D. Schurman were appointed a committee to revise the constitution. Rev. G. R. White, Rev. W. W. Lodge and Wm. McMurdo were named as a sub-com-

mittee from the executive to confer with the New Brunswick executive It is understood that an important

ninion government in connection with tia, has been named to have charge of the marine wharf and the oversight of charging the winter steamers in port and distributing of freight, the care of in which they have proven successful.

Kirkwood Enman,

white beds are women and girls who are awaiting or recovering from opera-tions made necessary by neglect.

Every one of these patients had plenty of warning in that bearing down feeling, pain at the left or right of the womb, nervous exhaustion, pain in the small of the back, leucorrhœa, dizziness, flatulency, displacements of the womb or irregularities. All of these symptoms are indications of an un-healthy condition of the ovaries or womb, and if not heeded the trouble will make headway until the penalty has to be paid by a dangerous opera-tion, and a lifetime of impaired usefulness at best, while in many cases the results are fatal.

The following letter should bring hope to suffering women. Mrs. Robert Glenn, of 434 Marie St., Ottawa, Ont., NORTON, Nov. 15-Springfield Lodge writes:

of the Independent Order of Good Templars was organized at Springfield,

Dear Mrs. Pinkham:--"Lydia E. Pinkham's Vegetable Compound is so well and widely known that it does not need my recommendation, but I am pleased to add it to the many which you have in ita favor. I suffered untold agonies from ovarian troubles for nearly three years, and the doo-Kings county, last evening by M. G. Harmer, D. G. C. T., of Norton, N. B., assisted by A. E. Floyd, W. H. Hug-gard, P. R. Stewart and E. L. Folkins, favor. I suffered untold agonies from ovarian troubles for nearly three years, and the doc-tors told me that I must undergo an opera-tion, but as I was unwilling to do this, I tried your Vegetable Compound and I am only too pleased that I did so, for it restored me to perfect health, saving me the pain of an operation and the immense bills attending the same. Pray accept my hearty thanks and best wishes." members of Fidelis Lodge, Norton, with eighteen charter members. Offi-cers elected as follows: Miss J. M. , deputy; Lee Kellier, C. T.; Mrs. J. A. S. Klerstead, V. T.; C. B. Vail, S.; Oliver Huggard, F. S.; Miss Jean Burns, treas.; W. deF. Kierstead,

marshal; Miss E. J. Kellier, S. of T.; Albert L. Reid, chaplain; J. Vail, A. Just as surely as Mrs. Glenn was cured of the troubles enumerated in S.; Miss Grace McIntyre, D. M.; Leslie her letter, just so surely will Lydia E. Pinkham's Vegetable Compound cure every woman in the land who suffers Urquhart, sentinel; D. H. Vail, guard. The lodge meets every Tuesday evening at 8 o'clock. Initiation fee for charfrom womb troubles, inflammation of ter members, 25 cents. Members jointhe ovaries, kidney troubles, nervous ing the next two weeks will have their excitability and nervous prostration.

Mrs. Pinkham invites all young women who are ill to write her for free advice. Address, Lynn, Mass.

great powers of Europe-English, Slaand Scandinavians-have not vonic. been deeply affected by the old Roman We have, in coming from Englaw. land, brought with us much of the English law, though in many respects it has become changed. Yet Roman law has made itself felt. In Louisiana, in the province of Quebec, in South Africa, and in Mauritius, in parts of India, the survival of the Roman law is found. Yet there are so many legal codes in existence, even in the British Empire, that the privy council is called upon to deal with more different problems than any other court in the world.

I should advise the opening up of the profession to ladies. This is a wide problem. Judges and juries are only This is a wide human and it is possible that the pres-ence of a lady pleading in courts might confusion. But in consulting work I think there is no reason why ladies should not be admitted. We have all followed the case of Miss French with the deepest interest, and will anxiously await the outcome. In England recently a lady was refused admission to the bar, but it may be that when the dependencies show us the way, we will in the old country exercise a more liberal mind.

If I were asked what is the greatest danger that threatens the American continent today, I would unhesititatingly answer, disregard of the law. In practically all parts of the United States and in some parts of Canada this is very evident. In Canada I need only mention as an instance the Scott Act, which has in most places become a standing joke, as it is not properly administered. In those districts ere it exists a stranger is shown the places where a drink cannot be had, and sometimes the places where it can be had. Again we see on bridges "Walk your horse or pay the fine," but the population prefer to trot their horses and not pay the fine. I have no hesitation in declaring that in the majority of districts of the United States and in many parts of Canada, law is more lightly regarded than in any part of England.

In conclusion let me ask you to enter upon your studies here not with the idea that you are to commit to memory a lot of dry facts, but that you are to study a noble science, one that controls our highest and 'best institutions, which regulates our social, husiness and family relations, and which is at once the pride and strength of our race.

Mr. Powell took up the further discussion of the Roman Law, drawing many comparisons between it and the English code. He referred to the fact that Canadian people had a habit of seeking legislation on the least ex-cuse. This is not the case in Engexland, where parliament has something else to do. English law to a great extent arises out of the moral sentiment of the country, and any law which is not so supported is useless. Thus in Canada through much legislation, there are on the statute books many laws worth the paper they are written We have a statute of frauds on which the framers declared was worth its weight in gold. Yet it is nothing more nor less than a farce, for it is totally disregarded in our financial

> To revert to ordinary folk. By steady average of fourteen cigars a day, William Pattison, of Michigan, managed in twenty years to account for 100,000 excellent weeds, a number that drew upon him the expostulation of his friends on the ground that such excess was prejudicial to long life; to which he opposed the fact that Goethe, though he drank 20,000 botles of wine, lived to be 83. So he smoked on unconcerned

ly, and died at the age of 89. Three years since, at Vienna, there died in his 73rd year an old man be-

side whose smoking record that of Wm. Pattison appears quite in significant. From his 27th year he kept an exact account of his consumption of beer and tobacco. In his 54th year he became a teetotaller, after having drunk 28,780 glasses of ale-a very modearte tally, working out at three a day. But it is of his immoderate smoking, which he continued til his death, that we have to speak

In forty-five years he smoked no fewer than 628,713 cigars, or 13,971 a year, giving an average of 38 a day. Out of this gigantic total 43,500 were given him at various times, leaving 585,213 which, although this Austrian devotee at the shrine of "My Lady Nicotine" never paid more than a penny for each one, cost nearly £2,500. But even this marvelous record is

beaten by that of Mynheer Van Klaes, known by the nickname of the "King of the Smokers." He was eighty-one at the time of his death and sometimes smoked as much as 10 pounds of tobacco in a week. How strong with him was the ruling passion in death was shown by his funeral.

At his express desire he was place coffin lined with the wood of old cigar boxes. At his feet were deposited a packet of "Corporal" and a blad-der of fine Dutch gold leaf, while at his side were laid his fovorite china. flying visit to the Methodist parsonage and tinder.
