PERSONALS

J. D. McCormack of Cabano spent several days here recently.
 Mrs. E. A. Stewart of Van Buren and Master Robert Wolverson of New Brunswick, are guests of Mr. and Mrs. Philie Rossignol.
 Mrs. L. A. Landry returned to Montreal on Monday, after a short visit with her parents, Dr. and Mrs. P. H. Laporte.

Mr. and Mrs. E.W.G. Chapman entertained at bridge on Thursday evening when the guests were Mr. and Mrs. J. Scott, Mr. and Mrs. P. G. Merritt, Mr. and Mrs. R. S. White and Mrs. Y. H. Emory, and Mr. C. P. Gombert. Prizes were won by Mrs. Emory and Mr. Merritt.
 L. K. Larson of London, England was in town for the past week and left on Monday for New York, where he will be located in the future.
 Mrs. D. A. Fraser entertained the members of her bridge club on Wednesday afternoon. Mrs. F. G. Merritt and Mrs. T. J. Scott were substitutes, and Mrs. F. Dodd Tweedie was the winner.

Mrs. K. S. MacLachlan of Montreal was a week-end visitor in town. Mr. and Mrs. E.W.G. Chapman entertained at bridge on Friday. The guests included Mr. and Mrs. W. R. Clarke, Mr. and Mrs. W. B. Morrison, Mr. and Mrs. G. MacFarlane, Mr. and Mrs. J. W. Hierarchy, Prizes were won by Mrs. Hierarchy and Mr. Morrison.

Mrs. H. A. Soely has returned to a visit with Mr. and Mrs. W. J. Dooly.
 On Monday evening, Mrs. Yonem entertained at four tables. The guests included Mrs. L. K. Larson, Mrs. M. G. Harding, Mrs. G. S. McNeil, Mrs. L. G. Garding, Mrs. A. G. Morrison, Mrs. W. H. Emory, Mrs. W. A. Deachman, Mrs. C. P. Gombert, Mrs. Harry Duchie, Mrs. Philie Rossignol, Mrs. Alice Bourgeois, Mrs. P. O'Brien, Mrs. A. A. St. Onge, Miss Helen Robinson, and Miss Ida Robinson. Prizes were won by Mrs. Deachman, Mrs. Robinson, and Mrs. St. Onge.

Mrs. R. O. Lockhart entertained on Friday evening. The guests included Mrs. L. K. Larson, Mrs. M. G. Harding, Mrs. G. S. McNeil, Mrs. L. G. Garding, Mrs. A. G. Morrison, Mrs. W. H. Emory, Mrs. W. A. Deachman, Mrs. C. P. Gombert, Mrs. Harry Duchie, Mrs. Philie Rossignol, Mrs. Alice Bourgeois, Mrs. P. O'Brien, Mrs. A. A. St. Onge, Miss Helen Robinson, and Miss Ida Robinson. Prizes were won by Mrs. Deachman, Mrs. Robinson, and Mrs. St. Onge.

Mrs. J. D. Castonguay, Mrs. M. G. Harding, Mrs. G. S. McNeil, Mrs. L. G. Garding, Mrs. A. G. Morrison, Mrs. W. H. Emory, Mrs. W. A. Deachman, Mrs. C. P. Gombert, Mrs. Harry Duchie, Mrs. Philie Rossignol, Mrs. Alice Bourgeois, Mrs. P. O'Brien, Mrs. A. A. St. Onge, Miss Helen Robinson, and Miss Ida Robinson. Prizes were won by Mrs. Deachman, Mrs. Robinson, and Mrs. St. Onge.

Mrs. A. J. Cyr entertained at a social bridge on Thursday evening. The guests were Mrs. Frank Bourgeois, Mrs. L. A. Landry, Mrs. J. D. Castonguay, Mrs. M. G. Harding, Mrs. G. S. McNeil, Mrs. L. G. Garding, Mrs. A. G. Morrison, Mrs. W. H. Emory, Mrs. W. A. Deachman, Mrs. C. P. Gombert, Mrs. Harry Duchie, Mrs. Philie Rossignol, Mrs. Alice Bourgeois, Mrs. P. O'Brien, Mrs. A. A. St. Onge, Miss Helen Robinson, and Miss Ida Robinson. Prizes were won by Mrs. Deachman, Mrs. Robinson, and Mrs. St. Onge.

SALLY'S SALLIES
 SO! - THAT'S WHAT SHE THINKS!!

Who's Who in Ottawa

By CHARLES ROSS, JR.

HON. HUGH GUTHRIE
 Minister of Justice

Long known as one of Canada's most promising young Liberal politicians, protégé of Laurier, silver-tongued, prominent of reciprocity, nurtured in a home where intellectual strength as fostered by the Bible, the shorter catechism and the editorials of George Brown's Toronto Globe, Hon. Hugh Guthrie sits in the front bench of the present House of Commons as minister of justice in the cabinet of R. B. Bennett. Son of a Liberal patriot and politician, a reformer of the stiff old Manchester school, young Hugh was nurtured and bred in the sturdy political brew of Mackenzie and Brown and Blake and Gladstone in Liberal ranks he succeeded beyond his father's fondest dreams. Then one night in 1918, after perhaps the most moving and eloquent speech of his career, Hugh Guthrie walked across the floor of the House on the conscription issue and renounced forever his political birthright. His apostasy shook Liberalism to the core and shortly afterwards Union government was born. The man who might have won the mantle of Sir Wilfrid Laurier put aside his all for an ideal. It is characteristic of the man that once a Democrat he could become no other than a Liberal. He recently built an addition to his home to take care of the chimney of his political convictions. He never goes fishing, golfing or yachting. He does, however, collect old pictures and pictures, old furniture, can sport a Dorian Gray and has one other in Canada. He recently built an addition to his home to take care of the chimney of his political convictions. He never goes fishing, golfing or yachting. He does, however, collect old pictures and pictures, old furniture, can sport a Dorian Gray and has one other in Canada. He recently built an addition to his home to take care of the chimney of his political convictions.

Score Of Nations Parade To Whitehall Seeking New British Trade Agreements

By FIERRE J. HOSS
 Central Press Canadian Correspondent

London, February.—Approximately twenty nations have been taking "bribe" with the British government in London this month in connection with trade agreements.

A steady stream of official delegates from this or that continent of South America, Canada is arriving or being from London these days each group loaded with documents and "white" arguments intended to show Whitehall why better trade agreements should be established between the island and their homeland. The negotiation pilgrimage was part of the Import Duties Act, Ottawa agreements, and it shows a growing feeling that the United States might announce the withdrawal of her trade war debts as a lever to force the British government to open the Ottawa conference, but were advised at that time that Britain was not in a position to listen until after the conference.

Argentina is going at it with a determination to bring home the bacon. It is delegated Dr. Julio Roca, the vice-president, to repy the compliment of the Prince of Wales' visit to the Argentine, and at the same time make the most of his opportunity to push for trade advantages. The Latvian government lost no time in getting M. Eika, its foreign minister to London, accompanied by Kacens, trade department director.

Finland, Ireland, Denmark, Norway and Sweden have already made longings hum with preliminary conversations and negotiations in regard to trade favors.

On record in Whitehall stand also express wishes to enter into tariff negotiations of such countries as Belgium, Colombia, Costa Rica, Estonia, France, Lithuania, Holland, Peru, Santo Domingo, Switzerland and Germany.

Character from Handwriting

By ROSEAN BYRD

AMOS J. HUNGEFORD
 Acting President, Canadian National Railways; Railroad Executive.

This is the signature of a man who has achieved success through the exercise of two outstanding characteristics—thoroughness and persistence. His handwriting is so much a matter of pride and honor to him that he has never permitted it to be used for anything else. His thoroughness is shown in the way he handles his duties with their imposed attachment through the mass of his smiling, ready for work, but not overdone, but he accomplishes with a degree more skill, a degree more speed, because of his understanding and the co-offense he has wrested from his thorough handling of previous tasks. He looks forward to the day when he can reach the peak but does not permit himself to try short-cuts. He never permits himself to do so. He is essentially the lone climber, but has all the qualities necessary for the good leader as well. He is the most practical and consistent, he is calm, and all that rigid self-discipline through the mass of his smiling, ready for work, but not overdone, but he accomplishes with a degree more skill, a degree more speed, because of his understanding and the co-offense he has wrested from his thorough handling of previous tasks.

Noted Scientist Visions The World Speeding Along On Virtual Magic Carpet

Professor Piccard Predicts Planes Shooting Through Stratosphere in Near Future and Eventual Flights in Rocket Ships

By M. O. CHENOWETH

Central Press Canadian Writer
 Chicago, February.—The world will be travelling on a virtual magic carpet within the next few years.

With science replacing the mysticism of the Bagdad fakirs, journeys through space with cannon-baited balloons, a matter of minutes will be a matter of hours.

Pressing the high speed era will be the development of a new type aeroplane, to be known as the stratosphere. This aeroplane, which will split the air at 400 or 500 miles an hour.

Then will come the space rocket ship, a bullet-like projectile that will make the distance between continents only a matter of minutes.

Piccard's Visions
 Without the aid of a crystal ball Professor Auguste Piccard, noted Belgian scientist and balloonist, envisions these things as the near future developments in aviation.

Professor Piccard, leader of the first expedition into the stratosphere, that region which lies far above the clouds and beneath the sky, believes that aviation should make use of the space that he twice has visited.

The region of which he speaks, from five to six miles up, is ideal for flying. "There is no wind, no below the clouds. And there are no weather disturbances, such as rain, storms or air pockets."

Stratospheric Planes
 The noted scientist made his flights into the stratosphere in an airship, built, attached to a balloon, but he will need machines in which to fly with an air-tight cabin and built to withstand extremely low temperatures, could not enter the stratospheric area.

"I do not know whether any aeroplane has ever reached the stratosphere or not," he says. "But there is nothing to prevent it if it is properly constructed."

The stratosphere will open up new methods of flying and then some day it will give way to the much-discussed rocket form of travel, according to the scientist. The how and when of such a ship he does not pretend to know, but he sees rocket transportation as inevitable.

"Probably shall not live to see it, but the rocket-ship will come," he says. "It will be built for long distance flights at high rates of speed."

Moon Rocket Possible
 "But I doubt whether one could be operated outside of our own atmosphere. A rocket flight to the moon might be possible, though, in where there is no wind resistance, the difficulty about that would be to get it back to the earth again," he says. Professor Piccard is not willing to venture a prediction as to when the rockets will be developed, how they will be constructed, or how they will be powered.

At present he is more interested in the developments of the stratosphere, which he hopes to see linking New York and Paris in a few years.

"Do not confuse the stratosphere with rocket-ships," he pleads. "The day of the rocket-ship is too far in the distance. But it is different with the stratosphere."

"Science has paved the way for the plane. Now we need only mechanical improvement, and that should be ready soon."

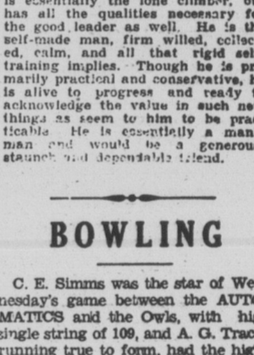

"Several ships are being built already. Some are being made in the Junkers plant in Germany and others in France. This is not a summer night's dream."

To Remember Aeroplanes
 The new stratosphere, he says, will not be unlike the modern aeroplane. The only difference will be that it will be more streamlined, have a more powerful motor and built to travel in an atmosphere where there is no wind resistance.

Waxing enthusiastic over the planes, the professor sees overnight trips between continents as possibilities with them.

BOWLING

C. E. Simms was the star of Wednesday's game between the AUTOMATICS and the OWLS, with high score of 190, and A. G. Tracey running true to form, had the highest three-string total of 286. The scoring:

Automatics	1st	2nd	3rd	Total
Sam Barber	81	74	74	233
C. E. Simms	109	70	76	255
C. S. Henderson	81	84	89	254
G. G. Gilles	72	73	86	231
A. G. Tracey	100	101	85	286
443	406	410	1359	

OWLS	1st	2nd	3rd	Total
E. Stevenson	104	80	87	271
J. Y. Yeomans	89	79	83	256
C. J. Chambers	91	90	91	272
G. Bernie	79	78	77	234
L. R. Michaud	94	91	99	284
457	418	421	1317

Poems That Live

UP-HILL
 Does the road wind up-hill all the way?
 Yes, to the very top,
 Will the day's journey take the whole long day?
 From morn to night, my friend,
 But is there for the night's resting place?
 A roof for when the slow dark hours begin,
 'neath the blink of an eye, as it were,
 y not the darkness hide it from my face?
 And are there walls that lean no more,
 As they have done before,
 Or a roof for when the slow dark hours begin,
 'neath the blink of an eye, as it were,
 y not the darkness hide it from my face?
 And are there walls that lean no more,
 As they have done before,
