

ling over the condition of the market. We retain 54c for a top quotation, but this is the very extreme, and can only be obtained on the perfection of quality. Even at 5c and below there does not appear as much inclination to purchase as last week, and throughout the market is depressed. On home account a limited movement, and some very fancy selections of Ohio flat exceeded 5c, but this price is about all that is obtained on any offering of Western at present.

Wool.—The crop is now pretty much all in dealers hands, and they are disposed to complain of having thus far fared badly. The farmers generally have made good disposition of their stocks, in doing which they were greatly favored by the spurt in prices which took place just at the opening of the clip. We have heard it estimated that they received on an average 1c to 2c per lb. more for their fleece than would have been paid could the present lifeless market have been foreseen. It is true that this is only the dealers' view of the matter, but it fits well with the course of prices, and we think it clear that producers are to be congratulated upon the outcome of the season. Manufacturers are buying very lightly, but the run of small orders is steady, and fair prices are obtained without difficulty. These are made as heretofore on the basis of new fleece at 20c to 21c.
