

Marmalade Purity

¶ The only reason that can be given for our being leaders and always having the orders of the most careful users of marmalade to fill, is the extreme care and uniform supervision over the whole process of manufacture from choice of fruit and sugar, to dealers who handle the finished product.

¶ We buy more of the highest grade of Seville Oranges than any other fruit kitchen in Canada. Then the sugar is of the very highest grade and the result of the *E. D. Smith* process is a treat like that which you had of old, at "Mother's." *If you can't get it at your grocer's—write direct.*

E. D. SMITH - WINONA - ONTARIO

Sold in large or small easily opened tins

AN INSURANCE POLICY ON A PAINT CAN

WHOEVER HEARD OF THE LIKE?
YES. THERE IS ONE SOLD.

Every can of paint bearing  as an imprint on the label is to you the guarantee of a longer life for the work to be done than can be secured by any other paint.

INSIDE AND OUTSIDE Everything Clean and Bright as New

Permanent newness only comes through using ML Paints and that means a great saving in time and labor. The fact is that through eighteen years of study and improvement we have found the one ingredient, and how to use it, by which to add the life and brightness to the paint without diminishing its surface covering qualities. It costs money to find and it costs a great amount of money to put that one ingredient into every can—but it goes in. You are the gainer.

ML FLOORGLAZE is part of the line and the range of usefulness here is surprising. In view of the approaching season and the work entailed you should write at once for help before you definitely plan how to do it. Hours of worry may be saved and a great deal of expense avoided.
