Through Using a

**NEW DE LAVAL CREAM SEPARATOR**

**P**ATRIOTIC DUTY, as well as dollars and cents, self-interest now demands of every cow owner the saving of every ounce of cream and butter-fat.

Likewise the saving of time that is possible through a cream separator of ample capacity, that is easily turned and always in order.

There was never a summer in the history of the country when both these considerations were of as great importance to the nation, as well as to the individual producer of cream and butter.

Under present circumstances, a modern De Laval Cream Separator will save its cost every few weeks. Every cow owner owes it to himself and his fellow countrymen to effect this saving.

This is true whether you have no separator or have an inferior or half-worn-out machine, even if it be an old De Laval model.

It is important to remember, too, that if you cannot pay cash for a New De Laval machine, you can buy one on such liberal terms that it will actually pay for itself while you are using it.

Why not see the nearest De Laval agent at once? If you do not know him, write to the nearest office for new catalog or any desired information.

Every New De Laval is equipped with a Bell Speed Indicator

**Our No. 4 All-Steel Self-Dumping Rake**

will give absolute satisfaction under any and all conditions. The wheels are solid, strong, interchangeable. The rake teeth are made of finest steel, oil tempered, elastic. The points of the teeth run parallel with the ground, and are so curved and adjusted that they gather up every bit of hay without digging into the ground or stirring up grit and dust. The self-dumping device operates from either wheel and is adjustable for use in either heavy or light hay, also adjustable for fast or slow driving. Our New Rake is made in 8, 9 and 10 ft. sizes, for either one or two horses. Write for free descriptive folder.
