SUGAR BEET.

Danish Improved Sugar Beet.—This variety is distinguished by its great productiveness; in rich, deep soil in good cultivation nearly approaching the standard varieties of Mangel-wurzels in yield of bulk, in connection with a high percentage of sugar. For fattening purposes, and for feeding to milk cows, in cases where a liberal flow of rich, creamy milk is the main object (for butter production), this variety is especially to be recommended. It is one of the cleanest and best beets for cattle feeding that we have. Price, oz., 10c.; 1 lb., 15c.; 5 lbs., 50c.; 10 lbs., \$1.00. Post paid.

Note, The Danish Improved Sugar Beet we offer is the genuine variety, and the stock of it is not controlled by any one seed house, as is claimed.

FREE!

FARMERS!

The leading improvement in Disk Harrows to-day is the spring pressure and its application to hard and soft ground. And to avoid weight on horses' necks the pressure must be applied directly over and in line with center of disk—just where you will find it in the Watford, and where it has been for years. See buggy spring construction for comfort. If no Watford agent in your neighborhood, write us and we will make an interesting price, which, however, must not be understood as having any bearing on the regular price, WHOLESALE OF RETAIL—just a special price for a special purpose. If in want of a good plow, just mention plows.
