NEWS OF NORFOLK

The Harvesting Season For Wheat and Rye is Opened Today

HAVILAND PICNIC
Twenty First Annual Family Gathering Held In Simcoe Saturday

Write Simcoe Agency Box 311 or phone 356-3 all matters regarding delivery or subscriptions; News items or advertisements.

(From our own Correspondent)
Simcoe, July 30.—Harvesting of rye and fall wheat begins in Norfolk to-day, lapping well with the hay making, which, with the ten days uninterupted hustling which ended on Saturday night, was still far from being completed.

The grain will be plump throughout the head, and the quality will offset to a degree the effects of the spring frosts. There will be cherries all week.

Home grown early potatoes will supply all local demand, though many are reluctant about selling.

The Silent Reaper.
Mrs. Samuel Chadwick died early Saturday morning at her residence, South Norfolk St., at the advanced age of 78 years. Deceased was a sister of the late Wat Brown of Tillsonburg, the late Mrs. A. Y. Polley of Simcoe, and the late Mrs. John Murphy of Orillia. The husband and two sons survive; the latter are engaged in business here as jewelers on Robinson St. The funeral will be held on Tuesday, to Oakwood.

The remains of Melissa Kniffen, wife of E. Buchanan, of Detroit, who was instantly killed on Friday evening when an M. C. R. train struck an auto in which deceased and her husband were riding, arrived here at 2:30 a.m. yesterday and were taken to the residence of Geo. Andrews, Woodhouse, from which the funeral will be held this afternoon to Oakwood.

Mr. Buckman was very seriously injured and unable to come over for the funeral. Deceased was a daughter of Walter Kniffen of Woodhouse, now aged 83. Her sisters and brothers are, Mrs. Geo. Andrews, Mrs. Byron Williams and Roy Kniffen of Woodhouse, Mrs. James Manderville of Tyrrell; Mrs. David Lemery, Campbell, N.Y.; Mrs. David McMillan, Toronto; Charlton Kniffen, Toronto, and William Kniffen, residence unknown.

Suddenly Taken Ill
Mrs. Jas. McKnight, of Colledge avenue, was summoned yesterday to the bedside of her brother, Peter Hagerman, who was taken suddenly ill at Burgessville, on Friday. She was taken home to Scotland on Saturday and developed pneumonia rapidly. His condition yesterday morning alarmed his physicians.

The Havillands in Town Saturday.
The Havilland family picnic, twenty-first year was held in Lynnwood Park on Saturday. Apart from an announcement made in this column a month ago there was no local mention of the event. The turnout was not as large as usual. There were less than one hundred present while there are usually from two to three hundred out. The Norfolk branch boasts of a connection of about a hundred and the patriarch of the present is Wm. Havilland of Waterloo, who is and has been for twenty years the President of the annual gathering. S. B. Nelles is vice-president and the secretarial duties are divided between Mrs. John Havilland of Boston and Mrs. Isreal Havilland, of the same place.

Among those present we noted the following as nearest akin to the old stock: Mr. and Mrs. David Flanders, Boston; Mr. and Mrs. John Olmstead, Boston; Mr. S. B. Nelles, Mrs. Wm. Snelvy, Waterloo; Mr. and Mrs. John Havilland, Boston; Mrs. Matthew Boughter, Waterloo; Mrs. Dr. Bowman, of Detroit; Mrs. J. W. Widner, Simcoe; Mrs. C. E. Smith, Corning; Mrs. Henry Martin, Boston; Mrs. J. Birdsall, Waterloo; Mr. and Mrs. Oscar Havilland, Boston; Mr. and Mrs. Isreal Havilland, Boston; Mr. Peter Edy, Ancaster.

The party took dinner at the long wood park, with access to the kitchen provided with gas stoves, boilers and everything necessary to heat water for tea, coffee, and washing up.

It is perhaps not generally known that this accommodation can always be had at Lynnwood for a key to the only condition being that the property be left as it is found and the called returned. Mayor Williamson busy Saturday to welcome the town's guests.

Havilland History.
Capt. John Havilland settled at Boston about the year 1810 with a

MAJOR 'RUD' MARSHALL LEAVING BUCKINGHAM

Major R. K. Marshall, son of Mr. Noel Marshall, chairman of the executive of the Red Cross Fund, who was mentioned in despatches this week. The picture shows Major Marshall leaving Buckingham Palace on the King's birthday after receiving his D. S. O. He is better known as "Rud" Marshall, polo player, cross country rider and general sportsman.

SEEMS EVERYONE IS ANXIOUS TO TRY IT

Recent Discovery of Ether Compound That Dries Up Corns so They Lift Out.

God news spreads rapidly and druggists here are kept busy dispensing frezeone, the recent discovery of a Cincinnati man, which is said to loosen any corn so it lifts out with the fingers.
You apply just a few drops on a little at any pharmacy, but is said to be sufficient to rid one's feet of every hard or soft corn or callus.
You apply just a few drops on the tender, aching corn and instantly the soreness is relieved, and soon the corn is so shriveled that it lifts out with the fingers.
This discovery will prevent thousands of deaths annually from locking jaw and infection heretofore resulting from the suicidal habit of cutting corns.

family of three sons and six daughters. His Benjamin fell heir to the old homestead lot 12 Con. 2 of Townsend and this in turn passed to a grandson, Elder Wm. Havilland, who died at Waterloo, who though 33 years of age was absent from Saturday's family gathering only because of illness of a son-in-law, Chas. Wimer, of Boston.

From Elder Havilland the homestead passed to his son, Israel, and later to a grandson William who is the present occupant. And here for years the annual picnic or basket party was held.

The Havillands are distinguished as physically large well knit, and sturdy men of exceptional longevity which, combined with a lack of procrastination in matrimony has resulted in this, that in the north of Townsend the blood is crossed into almost every household.

They are of U. E. L. stock, the head of the clan having been an officer in revolutionary war 1776, and having like many others, crossed the border.

Odd Ends of News
We understand that Mayor Williamson will presently issue a proclamation for a civic holiday on Monday, August 13th.

P. A. Coates is laid up with a sprained foot, received when the limb of an apple tree under which he was driving gathering hay, pushed him off the lead.

The rush to the lakeside yesterday was proportional to the oppressive heat of the day. About 350 from Simcoe went down by the L. E. & N. and about 100 more by automobile. Dover is no longer a burg of a quiet Sabbath.

A Welcome Letter
Sarah E. Murland, who was till recently housekeeper for Vernon Pettit, was discharged during the week-end, and being without any place of abode, arrangements were made by Reeve Carter for her temporary stay at the county house. A letter received on the way out to the institution, but not opened till her arrival there, contained an invitation to Niagara Falls, to stay with a sister there, and the lone woman lost no time in boarding the first train east.
Where Now, You Naughty Delin!
An auto owner at Delhi on Saturday evening got into trouble with the cop for not having the tail-light of his auto trimmed and burning. Reeve McPherson will doubtless have a call from prominent reactionaries with a cock-and-bull yarn about business leaving the burg and bank accounts being taken from Delhi to Langton or Wyecombe. Mack will be told that his by-law is a good one, but that it should not be enforced just yet.

HE SPENT ENOUGH TO PAY FOR HOME

Suffering of 30 Years cost Doman Hundreds—Tanlac Brings Relief

Remarkable, indeed, was the statement made a few days ago by John Loman, section foreman for the London and Port Stanley railroad, who lives at 134 Maitland Street, London, who declared that he has derived more benefit from two bottles of Tanlac than from other treatment or medicines that had cost him enough money to pay for a good house and lot. His statement follows:

"I have been a sufferer from stomach trouble and catarrh in my head for thirty years. My food would sour and seem like lumps of lead in the pit of my stomach. I suffered terribly from the gas on my stomach and heartburn and would sometimes belch up great mouthfuls of a substance so hot and sour it would put my teeth on edge. My appetite went back on me and for the past two years, that is until I began taking Tanlac, my breakfast consisted of corn-meal and milk. I was so nervous I could hardly sleep and would often get up at night and sit around trying to get my nerves quiet so I could get a little rest. I suffered a great deal from the catarrh in my head, had flighty feelings, was badly constipated and always taking something for this trouble. All my strength and energy seemed to leave me and I would get up in the mornings feeling unfit for my work.

"I have just finished my second bottle of Tanlac and have started on my third, and honestly, it has helped me enough to pay for a good home. Tanlac is the only thing that has ever helped my catarrh at all and I believe it will soon be gone entirely. I can eat anything that is put on the table now and it don't hurt me a particle. Gas has stopped forming and my tired, draggy feelings have left me. I go to sleep almost as soon as I get in bed at night, and never wake up until the alarm clock goes off in the mornings. I am not constipated like I was, don't have those dizzy feelings any more, and my strength is built up until I can do my work without any trouble. I expect to take three more bottles of Tanlac, as a clincher, and when my wife comes home from Michigan and sees what it has done for me, well it's great, everybody ought to know about it and it's a pleasure for me to tell them what it has done for me."

Tanlac is sold in Brantford by Milton H. Robertson Co., Ltd., in Galt by G. R. Ardill, in Orillia by M. H. Cooke and Co. in Stayner by N. B. West, in Elmville by W. J. McQuire.

Canadian Press Correspondent With the "Canadian Forces."
Canadian Headquarters in France, July 29.—During the past two days the artillery action on the front has increased in volume, until at times it has reached the dimensions of a drum-fire. The enemy's retaliation to our bombardment has been on several occasions extremely prompt and heavy. The object of his artillery has been to divert the attention of our guns. Efforts of enemy working parties to restore their defences have been prevented by a steady trench mortar bombardment. In this, as in other branches of the artillery, there has been a noticeable development. Some of the trench mortar projectiles now in use have almost as much high explosive in them as an ordinary 15.5 calibre howitzer shell. The destruction wrought by them in the trenches is very great.

There was another heavy projection of gas into the German trenches west of Lens yesterday, with but little retaliation.

The spurt of the enemy's aerial activity on this part of the front has ceased and only a few of his planes have tried to cross our lines. This result has been brought about by hard fighting on the part of splendid young fellows of the aerial service.

One of the most successful aviators in this area is an Ontario man, who has a record of 26 German machines brought down, most of them from such a height as to ensure their destruction.

With the British Armies in France July 30.—Numerous raids, which yesterday's British official communication mentions as having been carried out at various points, have been reported by both combatants, undoubtedly appear to distant readers as inconsequential in this greatest of world's wars.

But these tiny reconnoitring thrusts, which daily have been growing in number of late, are in truth, highly significant in themselves, for they are a surface indication of the great tension, existing along these nerve centres of the western theatre.

The material damage which small raiding parties inflict is of little consequence, comparatively speaking, to either side, but the information that these intrepid adventurers into No Man's Land may bring back is invaluable. The war along this front is far from being a stalemate, but these are not days for prophecy.

Despite the inactivity of the infantry, destructive artillery duels of great violence continue, and are ever increasing in volume. Along the coast region the guns have been pouring an unprecedented stream of shells into Neuport and neighboring places and the British have been no less vigorous in reply.

Further south Vimy and other points overlooking Lens, as well as Armentieres, are the object of unrelenting Teuton wrath, and the shell-barrage from the guns of both sides at times reaches the intensity of drum-fire, which is heard for miles back of the lines.

Using Gas on Foe
London, July 30.—The representation of the British High Command to the Council of the League of Nations, that it is hard work to take care of children and to work, wash, clean, and besides, that mothers should take more care of their children, is a good one, but that it should not be enforced just yet.
