CHRISTIAN ENDEAVOUR CONVENTION.

The fourth annual convention of the "Iron County Union" was held at River John Tuesday.

Arrangements were made to hold a special train in connection with the meeting, and this probably had something to do with the success of the convention.

The morning session opened in St. George's Church, the scene of the labours of the late Rev. J. Robertson, with the reading of the report of the retiring president, A. A. Rogers, which was followed by the report of the executive committee.

Rev. J. Robertson, who presided at the convention, was followed by the report of the executive committee, which was read by Rev. J. S. Smith.

Rev. J. S. Smith, in his report, mentioned the fact that the convention was held in a hall which was built by the Christian Endeavour workers of the town.

The evening session was opened by prayer and devotion, and Rev. J. S. Smith presided at the convention on the question, "Am I my Brother's Keeper?"

This was addressed by an unusually interesting address from Rev. R. Cumming on "The world for Christ—is it possible?" in which he traced the decay of the world's faith and the growth of the religion of Christ.

MACLELLAN TALKS TO THE FARMERS.

THE MAN FROM THE MINES. GENTLEMEN—A number of years ago I decided to address a letter to the farmers but was deterred last night it might be supposed that I had some ulterior purpose or selfish end in view, that I had the proverbial axe to grind in the abolition of political honors conferred upon any person.

Now I am nearing the half century mark and during that time I have devoted myself to the study of the soil and the farmer's life. I have seen the farmer in a reckless mood, I have seen him in a sober mood, I have seen him in a happy mood, and I have seen him in a sad mood.

It might readily be supposed that farmers and mechanics had nothing in common, that between them there is a great gulf fixed. This is not so. The farmer supports me with his wheat, but he, my eggs, milk, butter, and sometimes when in a reckless mood, I give you my cheese. Thus you see there is a good deal of common ground between us.

It might readily be supposed that farmers and mechanics had nothing in common, that between them there is a great gulf fixed. This is not so. The farmer supports me with his wheat, but he, my eggs, milk, butter, and sometimes when in a reckless mood, I give you my cheese.
