Wolfville, N. S., OCT. 23, 1891.

We are glad to see that a move has been made in reference to the naming of the streets of our town, as referred to in last issue. From a communication in another column it will be seen that a committee has been appointed to elect appropriate names and report to a public meeting to be called for the purpose. We trust that the committee will give the matter all the attention it deserves, and that the names selected may be such as will meet with the approval of all. We like the suggestion offered that residents should give the committee the benefit of their views, so that they may be assisted in the work. This is a matter in which all are interested, and we would like to see all have a say in it. Prof. Cold to show be seed to five the serious and case the the W. C. T. loathing for the European staff of lifeEight hundred Russian prisoners were
sent to the English commissary-general
at Constantinople to provide for. They
were offered wheaten bread of the best
quality. The whole eight hundred
rebelled against it. They would not
have it, and trampled it under foot.
Naturally soldiers are more easy with
their prejudices than the peasants, who
have never gone beyond the confines of
their native locality. But as a matter
of fact wheaten bread is said not to be
good for the palate and general health
of the Russians. His taste may possib
ly be the hereditary development of rye
and barley bread, the national food
supply.

We are sorry not to see his name on the committee.

There are thirty-two millions of starving peasants in Russia, and by all accounts they would prefer to go on starving rather than to eat wheaten bread.
