A Wise Spider.

A subscriber once wrote to the ditor of a leading paper, to tell him that he had found a spider in his paper. The writer, who was evidently superstitious, said he would like to know whether this was a sign of good luck or bad. The editor gave the following answer: "Finding a spider in your paper was neither good luck nor ad luck for you. The spider was merely looking over our paper to see which tradesman is not advertising, so that he can go to that shop, spin his web across the door, and lead a life of undisturbed peace ever afterwards.
