supply, will be exported to this country within the next few months. Supplies of codfish, haddock, hake and pollock are generally light in New York and holders are not making any concessions in prices because of their inability to procure desirable lots to replace those now on the spot. Most grades offering through this market are held at the quoted prices of a few weeks ago, and, despite the weakness in the West Indies there is no cutting of prices as yet. Newfoundland and American Porto Rico are held at \$70 and \$71 for medium, while large have reached \$78 in some instances, but not for this market. Cuban codfish remains at the the levels of a few weeks ago, with few offerings. There is a supply of haddock available, but little hake and pollock. On these latter grades prices are held firm.-N.Y. Fishing Gaettze. We have many other **First American** Deep-Sea Voyager. The first American built vessel to nake a deep-sea voyage, the Trial,

was launched in 1642, 277 years ago. The Trial was launched at Boston, and was for the purpose of carrying fish to England from the Massachusetts Bay Colony. The fisherman who owned the ship thought to save the freight and middlemen's commisions which had to be paid when the ish were exported in English bot-The Trial was rudely constructed

nd few people would care to trust their lives to such a craft nowadays, but the ship successfully crossed the Atlantic, bartered the cargo of fish for sugar and wine and returned by way of the West Indies.

THERAPION Nº. 1 THERAPION Nº. 2 THERAPION Nº. 3 THERAPION Nº. 3 coundland has reached a very low evel, and stocks are not selling. With heavy stocks of hard-cured codfish on hand, merchants and shippers in St. John's are reported to have little immediate business in sight. The European situation is none too hopeful at present, for Norwegian codfish is already in many markets and it has found a demand where other supplies have not. There are indications that some Norwegian cod, perhaps a heavy EDENS SHREDDED WHOLE WHEAT BISCUITS, 20 cases By rail to-day.

which he gave any price which was

asked. The place became a show where he entertained the greatest men of Europe with princely hospitality. The story of his later terrible financial embarrassment and his heroic struggle to pay his debts is too well known to need recapitulation. Goerge Morland, whose "Interior of a Stable" is one of the treasures of the National Gallery, was a terrible spendthrift. Dealers literally sat upon the doorstep whilst he painted and carried off the canvases wet from the easel, and for a time he made a very big income. But he livved lavishly, kept a dozen horses, was surrounded by a horde of sponging comrades, and, after being imprisoned several times for debt, died miserably at an early age. Lawrence was in most respects the very opposite of Morland, being a man of polished and gentle manners, but he was equally capable of earning fabulous fees and also of spending his income foolishly. He was always in pecuniary straits, although half the aristocracy were clambering up his steps to sit for one of his gorgeous canvases. He could never resist any thing which he thought beautiful, and it is said that on drawings by the old masters he spent no less than £ 60.000.
