Woman and the World

Mr. Balfour's Mother. Good Words for May. He pictures the mother of the leader of the Conservative Commons as distinctly nonconventional. She used to assume that better way than the customary could usually be found. "It might be quite contrary to the usual conventions of life; it might give rise to talk and comment; but these made no impression on her; she seemed to be without with patient self-control to a scandalous story about a well-known member of society, she said, with characteristic sweetness:

"Yes, he was very fallible, yet how capable of becoming that greatest of all things—a good man."

Of her own pains and aches, Mrs. Stewart would seldom speak. "Take care," she would say, if anyone had a tendency thus to complain, "or you will become that most dreadful of all things—a self-observant valetudinarian. I was once in a house with a sion on her; she seemed to be without ian. I was once in a house with a ear or regard for them." The net result in some cases is indicated by the story which an exchange tells of a little girl who had been instructed to learn a Scripture verse with the word "good" In it, and whose parents had accordingly taught her the text: "It is lawful to do good on the Sabbath day." The little maiden was supposed to have committed her verse thoroughly to memory, but when her turn came to recite in Sunday school, she startled the audience by reciting lispingly: "It awful to do good on the Sabbath The notion of reverence with proof: regard to the Lord's day is too little cultivated at the present time, but in order to "remember the Sabbath day to keep it holy," it is not necessary to go to the other extreme of rendering It awfully depressive to be good then or at any other time.

A Womanly Woman.

It was said of the celebrated Madame De Recamier, who was surrounded from youth to age with an admiring throng, that the secret of her fascination lay in the fact that she really felt the kindness she expressed. There recently died in London one of the most popular women who ever graced the social life of the great metropolis, and of her, as of Madame De Recam-ier, it may be said that her attracfaded. The finest carriages in London waited at her door, and her little drawing-room was thronged, not only with the most charming and influential people in "society," but with men and woman known to none but the hostess. every one went to see her.

Mrs. Duncan Stewart was the forunate possessor of social position, personal beauty and conversational these advantages lay the magic of her presence. A few side glimpses of this "society woman," who truly knew "how to abound," are taken from Mr. Augustus J. C. Hare's "Biographical Sketches":
