M'CLARY COMPANY WILL PUT UP FIGHT

the City Attempts to Interfere With Tramway.

The city will have a lawsuit on its hands if City Engineer Graydon and the board of works insist that the McClary Manufacturing Company tear down a tramway built within property on Wellington street. Not long ago the McClary Company erected the bridge connecting one portion of their plant with an other. It was constructed entirely

property. It was built of timber, and inclosed in galvanized iron. A complaint was registered with City Engineer Graydon regarding it, and he informed Col. Gartshore, manager of the big works, that as there had been no permit taken out for the erection of the tramway, it would have to come down,

Mr. Graydon's Position.

The only change that could be made would be in the material covering the tramway. City Engineer Graydon insists that there is an infraction of the building bylaw, but it is not likely that anything will be done, as there is no need of a lawsuit over the matter. The city is amply protected, and that is all that is required.
