

## THE ONLY MANURE SPREADER

operated with a single lever, and the only one having a Vibrating Rake. The single lever avoids complications in construction, is easy to work, strong, acts quickly and surely and is entirely efficient. No danger or liability to breakage by pulling the wrong lever. The Vibrating Rake is so constructed and so placed that it thoroughly evens up the load on its way to the cylinder. This insures perfectly even distribution and spreading and obviates the necessity of extra care in loading. Coarse and lumpy manure cannot always be loaded so as to produce a level load. The Vibrating Rake will make every load, of every kind of manure, perfectly even. In all other respects the I. H. C. Spreader is built as well as best material and superior workmanship can make it. Solid steel axles front and rear; steel wheels with broad faced tires, flanged to keep out dirt, mud, etc; traction lugs on rear wheels; power applied from both rear wheels; front wheels cut under—turns very short; steel track for apron. While exceedingly strong and capable of great strain the I. H. C. Spreader is of unusually light draft.

The I. H. C. Spreader spreads all kinds of manure rapidly, evenly and perfectly. It matters little if manure be strawy, chaffy, packed, caked, wet, dry or frozen, this machine will tear it apart and distribute it upon the land evenly. It will handle fine, composted manure for top dressing in the most perfect manner, and even the presence of corn stalks in the manure does not prevent the excellent quality of its work. It is the greatest labor saver of the age. Made in three sizes, 35, 55 and 75 bushels. Our nearest agent will supply you with printed matter, prices, etc. See him before buying, or write nearest branch house.
