

**COTTON-SEED-MEAL-FOR-COWS. \***

From the New England Homestead. Henry Morse, of Delaware County, N. Y., who has become wealthy by dairying, says that he has fed cotton seed meal to his cows for eight years, the first four in connection with other grains, and, after that, pure, excepting while the cows were dry and on coarse fodder; they were then given wheat bran and such grain as was produced on the farm. As soon as the cows came in full milk, they were given hay twice a day, and three quarts of cotton seed meal in the morning and two quarts at night. The morning ration of meal was mixed with six quarts of sweet skimmed milk. When at pasture they received two quarts of the meal a day. Following this practice he was able to keep 25 per cent. more cows, and make 20 per cent. more butter per cow, than by any other grain method. The manure from the cows fed so heavily on cotton seed meal was very rich and gave about double the crops of hay that other manures gave. The pastures also show it, and the increased value of the manure nearly pays for the cotton seed meal.
