IF NOT PERFECTLY SATISFIED

The prettiest part of rose day was the finale, when 600 of the pretty girls of Toronto and their chaperons, in many cases the smartest young married wo-men in town, dined in the Alexandra room at the King Edwara. They were nungry, as well as pretty, and did full justice to the exceedingly good dinne provided by Mr. Bailey. The beautiful room was brilliantly lighted, the hats laden with roses making a beautiful decoration; the music was excellent and the service given by the girls of the room was beyond praise. As for rose day, it was organized by the Imperial Order Daughters of the Empire, so that it goes without saying that everything went on greased wheels througt the day, and lots of money was collected for the children of the homes, the object of the day appealing to the public quite as day appealing to the public quite as strongly as the many patriotic funds al-ways on hand.

Miss Marietta Goodernam gave a small dance last night at Deancroft, in honor of her cousin, Miss Burk, London, Ont.

The engagement is announced in Kamloops of Miss Laura Eleanor Irwin, L.T. C.M., to Mr. Donald Roy Cameron, B.A., B.S.F., son of Mr. E. R. Cameron, K.C., and Mrs Cameron, Ottawa The wedding will take place early in June.

SEVENTY THOUSAND MAKING SHELLS

(Continued From Page 2).

dustry. Gen. Hughes is the pioneer of the work in the Dominion; the of the shell committee are simply the means by which he is carrying out this effective work, and splendid service for the empire. I say nothing of the zeal and enthusiasm with which he mobilized, equipped and despatched 33.000 men from Canada in seven short weeks after the decla-ration of war, and since then has sent ration of war, and since then has sent across the seas an equal number. That in itself is a magnificent achievement, and only in slightly lesser degree will the credit accrue to him for showing the way to the engineering firms of England, Ireland and Scotland, as well as other portions of the empire, to the manufacture of those munitions without which no war can be successfully carried on. You all read the fully carried on. You all read the other day the stirring words of Lloyd George at Manchester. I am glad to know that the factories of Britain are now being systematically organized for the production of ammunition, even after the lapse of so many months. Gen. Hughes was the first man in Canada to grasp this idea.

Organized Factories.

"Shortly after the war broke out the minister received an order from the Pritick Company of the country of the minister received an order from the Pritick Company of the country of the pritick Company of the pritick of the country of the c

the British Government for supplies of arms and ammunition. Contracts were placed for these both in Canada. and the United States, and then came the request for 200,000 shrapnel shells unloaded, in equal numbers of 15 and 18-pounders. Canada possesses, in the City of Quebec, a modern plant for the manufacture of shells, but its cathe manufacture of shells, but its capacity is 'limited. It can only produce 75 shells per day, which we now see was quite inadequate to meet the demand. There was only one thing to do. The minister of militia conceived the idea of utilizing the engineering factories through the Dominion for shell manufacture and to see

Committee Appointed.

"Accordingly, the following week, at a meeting called by Gen. Hughes at the Dominion Arsenal at Quebec, a committee was appointed to organize the movement thruout the Dominion The members of this committee are: Messrs. Thomas Cantley of New Glas-gow, George W. Watts, Toronto; E. Carnegie, Welland; Gen. T. Bens master-general of ordnance; Mr. J. W. Borden, chief accountant and pay-

master-general; Col. Harston and Col. Lafferty, the latter four representing the department of militia and defence. I had the honor to be named chairman of this committee. I accepted the office, because I felt it to be my duty. I had the additional satisfaction of knowing that there were associated with me enthusiastic colleagues who would do their utmost to make the would do their utmost to make the undertaking a success. In this I have not been disappointed. I cannot speak too highly of the splendid work of my

Got Good Man.

"Col. Lafferty undertook the technical instruction of the manufacturers, while to Col. Harston was allotted the equally important duty of super intending the examination and inspec tion. Before the end of the month we were fortunate to secure the services of Mr. David Carnegie of London, England, as ordnance adviser. You may realize how fortunate we were in this respect when I tell you that Mr. Carnesie when I tell you that Mr. Carnesie when I tell you that Mr. egie, who is one of the recognized wthorities on steel and munitions o war, was for many years in charge of the shell factory at Woolwich Arsenal-He is a fellow of the Royal Society Edinburgh, and an active member of

Edinburgh, and an active member of the most important engineering institutions in the motherland. Col. Carnegie took up his duties immediately, and since September last has been on the work day and night.

Refine Copper Here.

"Gen. Hughes was careful to impress upon the committee that to the utmost possible limit the component parts of the shells should be 'made in Canada.' This principle we have constantly kept in mind, and I am satisfied that when the war is over and these establishments cease manufacturing munitions, certain industries will have been created in the tries will have been created in the Dominion of a lasting character, from which the country will receive permanent behefit. For instance, I may mention that today the quantity of copper refined and smelted is a mere bagatelle, altho in 1914 the country exported approximately 80,000 tons of copper ore in matte form. On the other hand, Canada annually imports 21,000 tons of the refined product. Why should not the work of smelting and refining our native copper ores be done in Canada? You will be pleased to learn that as a direct out-

pleased to learn that as a direct outcome of the work of the shell committee this will be made possible. Our experience in nine months has demonstrated the fact that the development of this industry in the Dominion, while it would undoubtedly benefit every manufacturer who uses copper, is above all things a military necessity. Canada will not have to remain long under the reproach of having to import its refined copper, and I can assure you of this, that within three or four months we expect to be making in this country, from the native product, all the copper bands required in the production of shells.

"At the outset our work was largely of a formation of the state of the copper bands."

"At the outset our work was largely of a formative character. We wanted for Canadian shells." Heretofore none such had been forth-coming. Colonel Cantley was en-trusted with this work, and the counfor having rapidly installed and equipped a plant for producing the first steel made in Canada for shell

Vingent de Pau's new church will be heft in the grounds of the Sacred Heart Orphanage. Sunsyside, on Saturday, June 26th. Tickets can be procured from the committee or Mr. W. J. Faulkner, 105 Geaffrey street. Telephone Park 4851.

BROCKVILLE, Ont., June 10.—Mr. John D. Hayward, who recently joined the McGill University overseas corps following his graduation as abachelor of science, was married today in Trinity Church to Miss Mary B. Dealtry Woodcock, as flower-bearier of the Park Woodcock, Cakville, Ont. They were unattended, except by Master Teddy Kid and Miss Daisy Woodcock, as flower-beariers. Mr. and Mrs. Hayward left for Quebec and later will reside in Montreal. The groom excepts to go to the front shortly with his corps which will replace the Pricess.

"Starting with the first order for 200,000 shrapnel we have since placed explosive, trinito-toluene. The reve-orders aggregating 9,000,000 shells, nue alone from the contract placed consisting consisting of 15 and 18-pounder shrapnel; 18-pounder, 4.5 and 60-pounder high explosive shells. In addition we have placed orders for 100,000 cartridge cases, 5,000,000 fuses, 2.000,000 primers and 1.000,000 friction

Placing Contracts.

paration of gauges and their distri-bution and use involved considerable to weary you. labor, but we got it done and done well. To give you an idea of a certain feature of our work I may mention that the inspection of the various component parts, including the analysis of material, and physical tests call for the employment of over 300 inspectors, besides several chief inspectors. Most of the inspectors are experienced machinists and toolimskers. The final inspection of the finished shell is carried out by nearly 300 examiners and district inspectors, under the direction of Colonel Harston. Such an army of inspectors emphasizes the care which is being taken to produce satisfactory results, and which have been highly commented to finish ational crisis: I will say this, and I am sure every one of my colleagues of the committee with communities with in our work politics have had no place, and we have been given an absolutely free hand. This is a time of national emergency in which every true Briton must do his part according to the ability with which he has been endowed. In the patriotic work in which we are engaged I am sure that all those associated with us, the manufacturers as well as the workingmen of Canada, will do their part tory has been achieved. I close, as I began, with Lord Kitchener's words:

"Those who are every one of my colleagues of the committee will concur, that in our work politics have had no place, and we have been given an absolutely free hand. This is a time of national emergency in which every true Briton must do his part according to the ability with which he has been endowed. In the patriotic work in which we are engaged I am sure that all those associated with us, the manufacturers as well as the workingmen of Canada, will do their part to the ability with which he has been endowed. In the patriotic work in which have associated with us, the manufacturers as well as the working the patriotic work in the committee will and the committee will and the countries of the committee will concur, that in our work politics have had no place, and we have been given an absolutely free hand. This is a time of national emergency in which every true Bri tain feature of our work I may men-tion that the inspection of the various component parts, including the ancarried out at a certain place, the average number of shells fired daily being 300. As soon as the shells have passed examination, and have been packed ready for shipment, the manufacturer receives his cheque.

From Coast to Coast.

he Dominion. In Montreal alone 6 the Dominion. In Montreal alone 5 factories are employed. Toronto has 28, Hamilion 17 and so on thruout the Dominion from coast to coast. Practically every province in Canada is participating in this enterprise. The manufacture of shells in this country is giving employment to between 60.-000 and 70,000 artisans, while the total weekly worse hill assily amounts to weekly wage bill easily amounts to \$1,000,000. From these figures you will see what the shell-making industry means to the workingmen as well as to the manufacturers of the Dominion. The changes which were necessary in the captions of the various foctories. the equipment of the various factories by adding new machinery, or in the readjustment of existing plants were made by the manufacturers them-selves and at their own expense. These changes gave employment to many other factories which were not directneering factories thruout the Dominion for shell manufacture, and to secure the co-operation of employers and employes in the engineering trades to take up this patriotic work. As a manufacturer myself, I am free to confess that it was with some reluctance that we responded to Gen. Here the confess that it was with some reluctance that we responded to Gen. Here the confess that it was with some reluctance that we responded to Gen.

from the coke ovens of the Dominion from and Steel Company at Sydney, N.S., for the manufacture of the high with this company will be nearly \$5,-000,000: I mention this so as to give the gentlemen present an idea of what has been accomplished in one direction only, but I think you will agree with me that the value of having such an industry in Canada far outweighs any monetary consideration which may be

"Before awarding a contract careful investigation is made as to the ability of the firm to carry out the particular work assigned to it. If been most gratifying to find not only been m there is any doubt as to the plant being unsuitable a competent inspector is sent to report upon the state of the factory. You will quite understand that in order to safeguard the interests of the country the committee had not one of the finest features through the strength of the country the committee had not one of the finest features through the strength of the country the committee had not one of the finest features through the strength of the strength of the country the committee had not only a readiness to produce ammunition, but an eager desire amongst all to assist the committee in carrying out its duties. The cordial co-operation of both employer and employe has been one of the finest features through the country the committee had not only a readiness to produce ammunition, but an eager desire amongst all to assist the committee in carrying out its duties. The cordial co-operation of both employer and employe has been one of the finest features through the committee in carrying out its duties. one of the finest features thruout the strenuous times in which we are now involved. I wish to emphasize here in particular that the backbone of the machinery to the particular work assigned to him, and is furnished with a set of inspection gauges as a guide in mak-ing the manufacturing gauges requir-ed. The preparation of the drawing for the various parts, and the pre-
