

CHAPTER II. *continued.*

	PAGE.
8. Iguanodon	427
The continued adaptations of the physical conditions of the earth to successive distributions of life	481
Laws of succession.....	445
1. Essential differences of animals and plants of each period	445
2. Present limitations of species began before the human period	446
Evidently prophetic nature of successive developments	453, 477

BOOK III.

CHAPTER I.—Quaternary or human period a special creation for moral ends.

The glacial period closes the tertiary era	479
Its character necessitates the supposition of a break between the tertiary and human eras	482
Evidence of the re-construction of forms :	
1. From Dr. Knox	487
2. From Prof. Owen	499
Creation culminates in man	501
In whom there is :	
I. A unity of type	504
Proved by unity of organisation. Specific differences arising from degrees of development	506
II. A differentiated type	513
Proved by comparison :	
1. Of skeletons	513
2. Of crania	516
3. Of brains.....	521
a Special organs corresponding to special functions	526
b Reciprocal ratio of cerebral and mental development	529
1. In man	532
2. In animals	535

CHAPTER II.—Unity of the human race.

Organisation of brain modified by influences external and internal.....	550
Analogy (1) of plants, (2) of animals	557
