

☼ A WOMAN'S INVENTION ☼

THE patent Holder in which all Brainerd & Armstrong's "Asiatic Dye" wash embroidery silks are put up, like so many other useful contrivances in the home: was invented by a lady. It thoroughly protects the silk from soiling by handling or from being wasted.

To use it, simply cut through the silk at the little paper tag and then withdraw a needleful as required.

These silks are absolutely fast colors and are recommended and sold at 5c. per skein in holder by

SOCIETY DECORATIVE ART,
