

THE STORE OF QUALITY

We're Celebrating

We celebrate to-day the tenth anniversary of our move into our present showrooms and factory at the corner of Yonge and Temperance Streets. Before that we were twenty-five years at the corner of Yonge and King Streets. That is where we opened our retail store. We outlined our quality policy then—a policy which has made us successful—built up this big business.

Our present building is in the shopping district of Toronto—handy to all street car lines. It's the most complete and best stocked Fur building in Canada to-day. To get acquainted with it is to save money and get satisfaction. Our "battle cry" is

At the north gate, fronting the conservatory, a bed of hydrangeas is attracting the attention of every visitor; such splendid specimens of these plants have seldom been seen under the protection of Superintendent Poord. Massive gates have been erected at the south entrance. It is cemetery trust to carry the design throughout the entire Yonge-street front, by displacing the present out-of-date fence with one more in keeping with the merits of this picturesque cemetery.

DOES THIS INTEREST YOU? A prominent physician, famous for his success in the treatment of kidney and bladder diseases, attributes a great deal of his success to the following simple vegetable prescription: One ounce Fluid Extract Sarsaparilla; One ounce Compound Salsolite; Four ounces Compound Syrup Sarsaparilla. Mix, shake well, and take in teaspoonful doses after each meal and again at bedtime. Your druggist can supply the ingredients, and the mixture can be prepared at home at very little expense. This, the doctor says, acts directly on the kidneys, assisting them to filter the poisons from the blood and expels same in the urine, at the same time, restoring the kidneys to healthy normal action. We feel that a great many readers will be pleased to learn of this simple prescription, and knowing the ability of the physician whose formula it is, we do not hesitate to recommend it to any sufferer.

GORNELL EXPEDITION MADE VALUABLE FINDS. Uncovered Pre-Classical Site of Iconium and Established Connections With Greek World.

ATHACA, N.Y., Oct. 7.—The first report of the Gornell expedition to the Assyro-Babylonian Orient has just been received by Prof. Sterrett, its organizer. The party consists of A. T. Olstead, O. B. Charles and J. E. Wrench. The report says that the principal sites of the region explored have been fixed astronomically for the first time, disclosing many defects in even the best maps.

At Boghaz-Kiuei, at the suggestion of the German excavators, the Hittite inscription, one of the largest known, and generally considered quite illegible, was studied, and as a result of two and one-half days' work the greatest part of the inscription was read.

The pre-classical site of Iconium, the most important in western Asia Minor, has been found. Much of the pottery found there is similar to the earthenware found at Troy, and a better site for excavation has not yet been seen by the expedition. Over three thousand potsherds have thus far been inspected.

Most important are the various sherds of Mycenaean character, showing connection with the Greek world of the time of Homer. The Hittite inscription, it seems almost certain, says the report, that some of the most widespread inscriptions in regard to the earlier periods of Asia Minor and their connection must be modified or abandoned.

A marble idol of a type hitherto found only in the Greek islands in Mycenaean settlements was obtained at Athaca. This link between the early inscriptions of Greece and of Asia Minor is of very great interest.
