August Furniture Sale.

On Monday we commence our Semi-Annual Furniture Sale, which, to homeowners and householders, to hotel and boarding house keepers, will be one of the most important occasions of the year. Important because of the handsome saving effected by our August prices on reliable and worthy Furniture. Prices that cannot easily be matched, quality considered, and values that are only made possible because of our unequalled buying facilities. This is not a spasmodic effort. It is the result of wise and careful preparation commenced weeks and months ago, when manufacturers were eager to receive large orders or make quick sales for spot cash. These price suggestions make interesting and profitable reading:-

AN IMPERIAL PENNY CABLE.

Having succeeded, in a degree at least, in his Imperial penny postage project, Henniker Heaton is now directing his attention to Imperial cable expansion.

He suggests a reduction in the scale of the suggests a reduction in the scale of the suggests are duction at the suggests are duction in the scale of the suggests are duction at the suggests are duction. charges for cable messages that is startling in its extravagance. The scale he proposes is as follows: a penny a word between Great Britain and Europe; three pence to Canada and Europe; three pence to Canada and Canada a fits. Furthermore he thinks they should only be temporary, until it is possible to establish an Imperial penny cable, which is, in his opinion, what the Empire should possess. In an interview which appears in The London Daily Mail, Mr. Heaton says that Mr. Chamberlain is convinced of the value of the abolition of the present high rates, which is only possible by the Government's breaking the cable monopolies and acquiring a system that will make London the nerve centre of the

Last month the annual conference of the Lancashire and Cheshire Conservative Working Men's Federation was held at Blackpool and,

among other things, they debated the following resolution proposed by Councillor Bennett of Warrington: cillor Bennett of Warrington:

"That, having regard to the continuous growth of our Dominions, and the increasing rivalry of Foreign Powers, this Conference desires to urge upon the Government the importance of further strengthening. The army and navy is of opinion that both might be recruited with advantage from the colonies; and believes that the time is ripe to invite all parts of the empire to definitely contribute to their maintenance by assenting to the imposition in all its ports of a small special tax on foreign goods to be applied to purposes of imperial defence."

England, in order to keep its population from starving on the outbreak of war, and, on this account, may have been averse to the proposal of "a more excellent way" for meeting such a contingency. ONLY ONE IN TEN PAYING.

Report Brought From Circle City, Alaska, by a Gold Hunter. San Francisco, July 29.—E. Lewis of Circle City, Alaska, who came down on the steamer Portland, brings over \$25,000. He states that only one out of every ten claims states that only one out of every ten claims around Dawson is paying wages. Those that pay at all are paying big money.

On Elidorado Creek, he says, there are about three miles of really rich ground, and on Bonanza, every foot of which has been advertised as paying, there are more than twenty miles of absolutely worthless

W. H. Seton-Karr, M.P., was chairman of the conference, and, at his suggestion, the words from "by assenting" to the end of the resolution were debeted in order as he said "to avoid any division of opinion." It will thus be seen that a small special tax on foreign goods is not yet by any means a favorite proposal in the Old Country, not even when its object is to strengthen the fleet and armies of the Empire.

It must, however, be remembered that Mr. Seton-Karr is the advocate of the establishment of national gramaries in England, in order to keep its population. and steady.
