Capital Authorized \$500,000 - - - Issued \$388,150

This is the first opportunity the public have had of participating in Toronto's Taxicabs, which have been operating since April, 1909, with such good results that their success is now assured.

Popularity of Taxicabs

The introduction of the Taxicab with its charge, considering speed, time saved, distance covered, and number of passengers carried, has been accepted so readily by the Toronto public that a steady increase of equipment has been necessary, and more cabs are yet needed to supply the demand.

Comfort

The discomforts caused by the incessant crowding of the street cars, and the delays and annoyances of waiting and changing cars, as contrasted with the comforts of a private conveyance with no waiting and no crowding as provided by the Taxicabs give another roason for its popularity.

In Other Cities

This also explains the large number of Taxicabs now in use in Loncabs now in use in London, Eng., New York, Paris, and all the cities of civilization, until now there is not a city of any importance that has not installed or is not about to instal a Taxicab service, and gives a tangible reason why Toronto, which is growing rapidly, will have an increased demand for the Taxicab which will compare with that of other live cities.
