Dyspeptics Should Avoid Drugs and Medicines

Try a Little Magnesia Instead.

Some people instinctively shut their eyes to danger, and it may be that instinct, or custom or habit causes dyspeptics to take drugs, patent foods and medicines, artificial digestents, etc.

But closing the eyes does not banish the danger, and it is certain that neither drugs nor medicines possess the power to destroy the harmful excessive acid in the stomach, which is the underlying cause of most forms of indigestion and dyspepsia. They may give temporary relief, but eversincreasing quantities must be taken, and all the time the acid remains in the stomach as dangerous as ever.

Porcupinc McIntyre is doily commanding more interest, and its rapid attainment to one of the big mines of Porcupine is beginning to be appreciated. It is expected confidently that dividends will be started with the beginning of the year.

McIntyre has been adding to its mill equipment and has brought its capacity to 450 tons daily, to be increased within the next two or three weeks to 600 tons daily, indicating a new record in profits for the last quarter of the year. Underground conditions have been none the less favorable. A big tonnage of ore is being put into sight in the company's original holdings and its subsidiaries, being put into sight in the company's original holdings and its subsidiaries, Mcintyre Extension and McIntyre Jupiter, which it is expected wil be merged with the parent company next year. The rapid increase in McIntyre's assets and the establishment of new high record earnings with each succeeding quarter should represent the material on which to base a substantial enhancement in the market value of the security

SUING TO HAVE WALL REMOVED FROM LOTS

Three Property Owners on Mountdin Avenue Proceed Against Mrs. F. Whatmough.

The action brought by Mrs. Eleanor I. Bailey and R. T. Brown against Mrs. Frances Whatmough, will be assisted by the presence of J. J. Downey property in northern Ontario but success was achieved, and it would be a difficult matter to find a more thoroly reliable group of men than those in whom is vested the trusteeship of Inspiration Gold Mines. The entire Hillinger section of Porcupine is apparently deeply impressed with the excellent location of Inspiration Gold Mines, and reports are to the effect that the results to be obtained in the diamond drilling soon to start, will be watched with interest.

SIGNIFICANT STATEMENT

Charles M. Schwab of the Bethlehem
Sicel Company, in a recent speech, predicted that the big steel plants of the future will be on or near the Atlantic coast. He said the ore deposits of the lake region will be approximately exhausted in ten years at the present rate of consumption. Coastal plants can draw upon ore of South America, Cuba and India. This statement, taken in conjunction with the movement in Dominion Steel and Nova Socia, is regarded as more than significant.
