

entirely by its own Faculty, composed of Medical teachers of long experience who are fully conversant with all that is required to constitute a thoroughly practical medical education.

From its inception, "STABILITY AND EFFICIENCY with PRACTICAL TEACHING IN EVERY BRANCH," has been the motto and the basis on which the College has been and will continue to be conducted, and to this its great success is undoubtedly due.

The only modification made in this Institution for many years was the passing of an Act by the Legislature in 1887, raising "Trinity Medical School" to the standing and dignity of a "Medical College," a position well earned by many years of successful teaching.

TRINITY MEDICAL COLLEGE GOES ON ADVANCING AND IMPROVING Session by Session, and keeps fully abreast of the rapid advances of science in every branch and of the requirements of the Medical profession, as laid down from time to time by the Ontario Medical Council.

Thoroughness, in TEACHING—making it throughout as PRACTICAL AS IT CAN BE MADE,—PUNCTUALITY and ZEAL in all College work will, as heretofore, be steadily maintained in view of the high position this Institution has reached as a teaching body, by continued attention to these fundamental essentials of a sound medical education.

All the lectures, except those on Clinical Medicine and Clinical Surgery, are delivered in the College Buildings, situated in the immediate vicinity of the Toronto General Hospital. The College has found it essential to Medical students and a great saving of their valuable time, to have all the lecture rooms where they learn the nature and the various forms of disease, AND ALL THE BRANCHES OF SCIENCE RELATED TO MEDICINE, as close as possible to the General Hospital, where cases are seen which practically illustrate what has been taught in the class rooms. The Clinical teaching is all done in the Hospital. Very special attention has been paid to the fitting up of the Lecture and Dissecting Rooms, Laboratories, etc. They are large, exceedingly well lighted, and contain every appliance required for Practical Teaching. The Trinity Laboratory in the General Hospital, where the students see practical work relating to disease, is furnished with all that is required for the most careful investigation of morbid products.

One of the largest rooms in the College, well lighted from the ceiling, is set apart for the Museum; and the Reading Room is well
