

PARIS DOCTOR SAYS CANCER IS FORM OF MILDEW

Claims To Have Found
Causes of Several
Diseases

I. B. SPONTANEOUS

Declares Original Sources of All
ments Lie In Men's
Daily Food

Canadian Press

PARIS, April 27.—That cancer is caused by an abnormal form of mildew is the claim set up in a paper written by Prof. P. Tissot, of the Paris Natural History Museum, and read before the Academy of Science last night by Prof. J. A. D'Arsonval.

Mildew, Dr. Tissot declares, is the original cell from which all life on earth developed, and all animal and vegetable organisms are nothing but highly developed organized mildew.

Dr. Tissot says he succeeded in taking healthy human tissue, changing its form and transforming it so that cultures developed cancerous elements and these elements could be reproduced as easily as cultures of microbes. The cultures

Germany Honors Hindenburg For Sixty Years of Service

That President Von Hindenburg is a popular idol in Germany at this time is indicated by this photo. It shows the former war lord (indicated by cross) arriving at the Wilhelmstrasse, Berlin, to review the national militia as part of the celebration staged in honor of the sixtieth anniversary of his entry into the military service.

so obtained also contained bacterial elements, which, together with the other elements, form what Dr. Tissot de-

scribes as the "cancer virus" and as a result to the virus of tuberculosis. This led him to study numerous diseases, the cause of which is unknown to science and he claims that he has been able to ascertain the cause by isolation.

MEASLES AND LETTUCE
Thus, he found that the virus of measles is identical with the organic mildew of lettuce; that of exanthema and measles with the mildew of the carrot; the virus of eruptive typhus with that of oats; the virus of vaccine and smallpox that of the potato; chickenpox, of the tomato; foot and mouth disease in cattle, also in the potato, like smallpox.

Pursuing his research into the virus of diseases incompletely or incorrectly known, Dr. Tissot claims to have discovered that syphilis is caused not by the spirochaeta, but by mildew and similarly that malaria is not due to the hematocoon but to mildew of rice and certain vegetable organisms.

SAYS T. B. SPONTANEOUS
Dr. Tissot claims to have transformed tuberculosis cultures into mildew which he found was identical with that of the human organism and this led him to what he considers the important conclusion that tuberculosis develops spontaneously in man, although it can, when once developed, be transmitted by contamination. Therefore, he argues, the proper way to prevent contagion is not to suppress the cause of contamination, but eradicate spontaneous development of the disease.

He reaches the conclusion that the original sources of most diseases exist in man's daily food, but that contamination by foodstuffs is very rare. Food is only dangerous when mildewed or rotten.

A MISTAKE
HE CAME home one evening and found his wife sewing a tiny garment.
"My dear! My dear!" he cried.
"Don't be silly," she replied. "This is my new dinner gown."—Judge.

Spring's unrest makes you long to own a magic carpet. A JAEGER pure wool travelling rug, with the magic of warmth and comfort, makes a wonderful wandering companion.

JAEGER
(Pure Wool)

No Corn
keeps
hurting
over
3 seconds

"Gets-It"
gives world's fastest
relief

NO matter where it is, how bad it hurts, how long you've had it, or what kind of corn it is, "Gets-It" will stop the pain in 3 seconds. All pain goes at a touch. Then the corn shrinks up and goes away altogether. You walk, dance, wear tight shoes all you want. For your own sake try "Gets-It." At drugists. Costs only a few cents for several months' supply.

Aid Is Preparing For "Flower Day"

Preparation of Dainty Little
Nosegays Now Occupying
Attention of Members

Women's Hospital Aid members have a novel and very fascinating occupation at the present time when they are assisting in the preparation of the dainty little nosegays which are to be used for "Flower Day" on May 8.

The "Flower Day" is a substitute for "tag day" and it is confidently believed that the little nosegays will prove a more tempting badge for the contributor than the familiar bit of pasteboard which has been used on recent tag days.

Deaths

Miss Caroline Holly

After an illness of seven weeks, Miss A. Caroline Holly passed away last evening at 9 o'clock at the General Public Hospital.

Miss Holly was 22 years of age and a graduate nurse of the hospital which, as the place of her three years of training, had been a very happy home to her. She was of a very sweet disposition and as a nurse she was devoted to her work and endeared herself to her patients. It was fitting that she herself should have the loving care of two of her classmates and devoted friends throughout her long illness.

Miss Holly was the daughter of Mr. and Mrs. Murray McLellan Holly, who resided in Saint John up to about one year ago when they moved to Gaspé, where Mr. Holly is with the Shepard and Morse Lumber Company. Miss Caroline Holly was one of those in the fatal automobile accident on the Gaspé coast several months ago when Mr. H. A. Mence's car plunged over a precipitous cliff.

Although painfully injured herself in that tragic accident, Miss Holly gave timely and skilled assistance in caring for the other members of the party and gave no heed to her own suffering.

Mrs. Holly was called to the city by her daughter's illness and has been staying with a cousin, Mrs. Pearl Jordan.

Many friends in New Brunswick will regret to learn of the death of Fannie S. Randall, which occurred at Montclair, N. J., on April 23, at the home of her sister, Mrs. Frank A. Hall.

The late Miss Randall was born and educated in Boston and came to St. George, N. B., with her father, the late Captain Benjamin Randall, who owned and operated the lime kilns at that town. After leaving St. George she lived for many years in San Francisco, later making her home with her sister in Montclair.

Little Dorrit Is Basis of Opera

LONDON, April 27.—Eduard Klenke, German operetta composer, who is visiting London, announces that he has almost completed Dickens' "Little Dorrit," his favorite novel. He said it would be produced first in Düsseldorf and probably later in London.

Look for 5 POINTS when selecting Fine Hosiery

Holeproof offers you 27 Paris colors

THE most careful inspection often fails to reveal 5 common flaws that destroy smartness the moment you put hosiery on.

Now Holeproof safeguards you against these common imperfections. Longer wear results. And smartness is attained to such degree that fashion rates Holeproof styles authoritative.

Note below the tests of style correctness. See how Holeproof answers them.

[1]
No imperfections. Style vanishes with imperfections. And here Holeproof safeguards you by nine separate inspections. It is a fact that few other fine hose are so uniformly perfect.

[2]
Correct Paris shades. Paris authorities select the newest colors. Our scientific dyeing process keeps them clear and bright. Our anti-fade treatment protects from fading.

[3]
Superlative transparency. Even in the heavier weights there is no cloudiness, no streaks. First, the silk is tested, then it undergoes the scientific Holeproof treatment.

[4]
No loose ends. Loose threads mar appearance. So Holeproof carefully trims the inside of each stocking by hand.

[5]
Exquisite clearness. In sheer chiffons, clearness comes only with the use of uniformly even thread. The lack of it in cheaper silk causes unsightly shadow rings. So, at greater cost, Holeproof selects in China the silk judged finest of all oriental grades.

Every Holeproof number has this five-fold fashion safety. Go to
